6. LITHOLOGIC LOG

Material	Water Strata	From	To	Thickness
On this date we abandoned a 260' well by perforating with Mills Knife from 260' to 50'. We then pumped 2.5 cubic yards of neat cement mixed 5.2 gallons of water per sack, we pumped using tremie pipe from the bottom to the top of the well. We then cut off the top 2' of the casing. We attempted to deepen this well but the casing failed and we had to drill a replacement well.
