6. Additional Notes or Comments

We abandoned this well by pouring concrete into the well from the top and filled the well from the bottom of the well up to surface. The well was abandoned due to no water in the well. During cleaning of the well well to try and get more water, the well had collapsed at approximately 180' with no water in it. We used approximately 2.25 cu. yds. of concrete.
The well was abandoned per Hamilton Reed's phone directive.
