6 Additional Notes or Comments

Installed 13 Joints of 3" pipe, Introduced Neat Cement consisting of 728 Gals H2O and 13,160 LBS cement. This should have been enough to abandon well. Customer had concrete batch plant at location another 100 Gals H2O and 5,200 LBS cement was put in well to bring it within 3' of surface where customer wanted to cut off casing. There must have been a large void in well, But I believe we sealed it properly. There was only a short time period between pumping Neat cement
