6. LITHOLOGIC LOG

Material	Water Strata	From	To	Thickness
This well was an 8" well that Aqua				
had deepened in 1989 using a 6 5/8				
liner. We measured bottom at 200'.				
We measured top of liner at 80'.				
The well has been "belching" dirty				
water and sand for the last several				
months. We installed a 5" liner				
from bottom to 2' from top. We				
installed 3/8" pea gravel in the				
annulus between the 5 and 8" and				
probably fell between the 6 and 8".				
We then installed the pump and				
tested the well for sediment and				
color. Well is in a vault and				
down about 6'. 5" liner begins				
about 8' from surface or 2' from				
top of casing in the vault.
