6. LITHOLOGIC LOG

Material	Water Strata	From	To	Thickness
On this date we abandoned the 6 5/8" well by perforating the casing at 1' intervals and 4 around from about 87' to 19' using Mills Knife Perforator. We pumped approximately 33 cu. ft of neat cement mixed with 5.2 gallons per sack using tremie pipe from the bottom to the top of the well. We then cut the top five feet off the well head and we left the excavated hole for backfill.
