#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the place and manner of use of the waters of an underground source as heretofore granted under Permit 39899, Certificate 12767, is issued subject to the terms and conditions imposed in said Permit 39899, Certificate 12767 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 53419, 53423, 53424, 53432, 53433, 54134, 54138, 74685, 74686, 78118, 78119, 78120, 78121, 78122, 78123, 78124, 78125, 78126, 78127, 78128, 78129, 78130, 78131, 78132, 78133, 78134 and 78135 shall not exceed 13,000 acre-feet annually.

The total combined duty of water from this well under Permits 53432, 53433, 54134, 78130, 78131, 78132 and 78133 shall not exceed 4,480 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

(Continued on Page 2)

The permittee shall submit a revised Monitoring Plan which updates the May 2006 Monitoring Plan approved by the State Engineer in the matter of Permits 53423, 53424, 53433, 74685, 74686, 78118, 78119, 78120, 78121, 78122, 78123, 78124, 78125, 78126, 78127, 78128, 78129, 78130, 78131, 78132, 78133, 78134 and 78135, to include pumping under this permit. The revised Monitoring Plan must be approved by the State Engineer prior to any pumping under this permit.

The point of diversion and place of use are as described on the submitted application to support this permit.

A total of 320.0 acre-feet annually is abrogated from the base right. However, pursuant to NRS 533.3703 **only 264.0 acre-feet (the net consumptive use amount) at 1.7 cubic feet per second can be diverted annually. Additional duty up to the total may be granted if it can be shown that this additional duty will not cause the consumptive use amount to be exceeded.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

September 17 2015

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

September 17 2024

Map in support of proof of beneficial use shall be filed on or before:
