APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of the waters of an underground source as heretofore granted under Permit 53830 is issued subject to the terms and conditions imposed in said Permit 53830 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 46029, 46030, 53829, 53831 and 56150 is initially limited to 2200 acre-feet. At least four groundwater monitoring wells are to be located or installed within the general area of the production well under this permit at locations approved by the State Engineer. These monitoring (CONTINUED ON PAGE 2)

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.0 cubic feet per second, but not to exceed 723.97 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before August 30, 1993

Proof of completion of work shall be filed before September 30, 1993

Application of water to beneficial use shall be made on or before August 30, 1994

Proof of the application of water to beneficial use shall be filed on or before September 30, 1994

Map in support of proof of beneficial use shall be filed on or before N/A

(O)-1108 (Rev. 6-81)~~

## (PERMIT TERMS CONTINUED)

wells must be installed prior to any diversion of groundwater allowed by this permit. The monitoring wells must penetrate at least 75 feet below the existing water table. The total combined duty of water allowed under Permits 46029, 46030, 53829, 56150 and 56233 may be raised to a maximum of 4400 acre-feet in stages and as approved and authorized by the State Engineer only after the State Engineer has determined that the additional withdrawal will not adversely affect existing rights or the groundwater resource, and upon showing that the withdrawal of water is developed in the Horse Springs formation. The permittee will maintain pumping records on the amounts of water withdrawn and submit copies of these records to the State Engineer on a monthly basis. Water level measurements will be maintained on the monitoring wells and copies of these records will be submitted to the State Engineer on a monthly basis.

All of the applicant's permanent wells that are located within a quarter mile of the Las Vegas Wash and/or penetrate shallow portions of the Muddy Creek Formation will be constructed with a minimum of 100 feet of cemented casing below the elevation of the adjacent wash.

All of the applicant's permanent wells must be constructed so that they draw only upon the Horse Springs Formation as a source for groundwater appropriation.

This permit is issued subject to the State Engineer's ruling dated July 12, 1990.
