

**APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED**

Date of filing in State Engineer's Office AUG 8 1991

Returned to applicant for correction.....

Corrected application filed..... Map filed.....

The applicant Brady Power Partners  
6200 S. Syracuse Way, Suite 125 of Englewood  
Street and No. or P.O. Box No. City or Town  
Colorado, 80111  
State and Zip Code No. hereby make... application for permission to change the  
Point of diversion and manner of use of a portion  
Point of diversion, manner of use, and/or place of use  
of water heretofore appropriated under Permit No. 48675  
Identify existing right by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and identify right in Decree.

1. The source of water is underground  
Name of stream, lake, underground spring or other source.
2. The amount of water to be changed 1.0 cfs  
Second feet, acre feet. One second foot equals 448.83 gallons per minute.
3. The water to be used for Industrial (Geothermal Power)  
Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals.
4. The water heretofore permitted for Industrial and Domestic (Geothermal Power)  
Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals.
5. The water is to be diverted at the following point NW $\frac{1}{4}$ SE $\frac{1}{4}$  Section 1, T22N, R26E, Mt. Diablo  
Describe as being within a 40-acre subdivision of public survey and by course and Meridian, (Well 56-1) or at a point from which the S $\frac{1}{4}$  corner of said Sec 1 bears S distance to a section corner. If on unsurveyed land, it should be stated.  
12°54' W a distance of 2061 ft.
6. The existing permitted point of diversion is located within SW $\frac{1}{4}$  SE $\frac{1}{4}$  Section 1, T22N, R26E, MDB & M  
If point of diversion is not changed, do not answer.  
or at a point from which the south  $\frac{1}{4}$  corner of said Section 1 bears S 60°15'W 1500  
feet.
7. Proposed place of use SE $\frac{1}{4}$  Section 1, T22N, R26E, MDB & M  
Describe by legal subdivisions. If for irrigation state number of acres to be irrigated.
8. Existing place of use SE $\frac{1}{4}$  Section 1, T22N, R26E, MDB & M  
Describe by legal subdivisions. If permit is for irrigation, state number of acres irrigated. If changing place of use and/or manner of use of irrigation permit, describe acreage to be removed from irrigation.
9. Use will be from January 1 to December 31 of each year.  
Month and Day Month and Day
10. Use was permitted from January 1 to December 31 of each year.  
Month and Day Month and Day
11. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) Well via pipeline to power plant facilities  
State manner in which water is to be diverted, i.e. diversion structure,  
and to injection well  
ditches, pipes and flumes, or drilled well, etc.
12. Estimated cost of works well, \$500,000
13. Estimated time required to construct works 1 year

14. Estimated time required to complete the application of water to beneficial use..... 1 year

15. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use:

This well will be one of an estimated 7 to 15 production and injection wells to be drilled in order to supply geothermal heat to a power generating facility at Bradys Hot Springs. Existing map is 48562

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of a portion of the geothermal fluid heretofore granted under Permit 48675 is issued subject to the terms and conditions imposed in said Permit 48675 and with the understanding that no other rights on the source will be affected by the changed proposed herein.

This permit is issued subject to existing rights. It is understood that the amount of geothermal fluid herein granted is only a temporary allowance and that the final right obtained under this permit will be dependent upon the amount actually placed to beneficial use. It is also understood that this right must allow for a reasonable decrease of fluid pressure and heat. The well shall be equipped and maintained to prevent any waste of the geothermal fluid. Accurate measurements must be kept of discharge of the production well and the amount of fluid injected into the injection well to determine the total amount of fluid diverted and consumed for a beneficial use.

The production and injection well are to be cemented from the producing levels to the surface to protect fresh water zones. This permit is issued subject to the condition that only geothermal fluids are to be diverted and used beneficially for heating purposes and fresh, cold water aquifers are not to be diverted. The used geothermal fluids are to be returned to the source via the injection well. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies. A detailed log on the (CONTINUED ON PAGE 2)

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.0 cubic feet per second, but not to exceed 724 acre-feet per year.

Work must be prosecuted with reasonable diligence and be completed on or before.....

Proof of completion of work shall be filed before.....

Application of water to beneficial use shall be made on or before.....

Proof of the application of water to beneficial use shall be filed on or before.....

Map in support of proof of beneficial use shall be filed on or before.....

Completion of work filed.....

Proof of beneficial use filed.....

Cultural map filed.....

Certificate No. .... Issued.....

IN TESTIMONY WHEREOF, I, R. MICHAEL TURNIPSEED, P.E. State Engineer of Nevada, have hereunto set my hand and the seal of my

office, this 12th day of August

A.D. 19 91

## (PERMIT TERMS CONTINUED)

injection well and/or other analyses of the system used for returning the used geothermal fluids to the source must be submitted together with the Proof of Completion.

An annual report for this well must be filed under this permit describing the amount of geothermal fluid diverted and consumed to a beneficial use for the calendar year. This report must detail the amount of fluid produced and injected.

The total withdrawal of the geothermal fluid under Permits 48675 and 56653-T shall be limited to 3.620 acre-feet per year but the total consumptive use of the geothermal fluid is limited to only incidental fluid losses in the system and in no case shall it amount to more than 20% of the volume withdrawn annually. The State Engineer does not waive the right to make a determination of incidental fluid losses at any time and impose additional conditions thereto. This permit is further issued subject to the provisions of NRS 533.372(1) and with the understanding that the power or energy generated by the beneficial use of this water or steam is subject to recapture and use within the boundaries of the State of Nevada when the need arises.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on August 12, 1992 at which time all rights herein granted shall revert to the right being changed by this temporary permit.
