Serial No. 56877 T

## APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Date of filing in State Engineer's Office OCT 28 1991

Returned to applicant for correction \_\_\_\_\_

Corrected application filed \_\_\_\_\_ Map filed NOV 6 - 1991The applicant Brady Power Partners6200 S. Syracuse Way, Suite 125 of Englewood  
Street and No. or P.O. Box No. City or TownColorado, 80111 hereby make \_\_\_\_\_ application for permission to change the  
State and Zip Code No.Point of Diversion of a Portion and Place of Use of a PortionPermit 47166  
Point of diversion, manner of use, and/or place of use  
of water heretofore appropriated under \_\_\_\_\_  
Identify existing right by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree andIdentify right in Decree.1. The source of water is Underground  
Name of stream, lake, underground spring or other source.2. The amount of water to be changed 1.0 CFS  
Second feet, acre feet. One second foot equals 448.83 gallons per minute.3. The water to be used for Industrial and Domestic (Geothermal Power)  
Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals.4. The water heretofore permitted for Industrial and Domestic (Geothermal Power)  
Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals.5. The water is to be diverted at the following point within the SE $\frac{1}{4}$  NE $\frac{1}{4}$  Section 1, T22N., R26E.,  
Describe as being within a 40-acre subdivision of public survey and by course and  
M.D.M. or at a point from which the South one-quarter corner of said Section  
distance to a section corner. If on unsurveyed land, it should be stated.  
bears S0° 25'E, a distance of 1540' (Well 46-1)6. The existing permitted point of diversion is located within the NW $\frac{1}{4}$  NE $\frac{1}{4}$  of Section 12, T22N.,  
If point of diversion is not changed, do not answer.  
R26E., MDM, or at a point from which the North  $\frac{1}{4}$  corner of said Section 12  
bears N 24°26'38" W. 724.98 feet.7. Proposed place of use SE $\frac{1}{4}$  Section 1, T22N., R26E., M.D.M.  
Describe by legal subdivisions. If for irrigation state number of acres to be irrigated.8. Existing place of use within Section 12, T.22N., R.26E., MDM  
Describe by legal subdivisions. If permit is for irrigation, state number of acres irrigated. If changing place of use and/or  
manner of use of irrigation permit, describe acreage to be removed from irrigation.9. Use will be from January 1 to December 31 of each year.  
Month and Day Month and Day10. Use was permitted from January 1 to December 31 of each year.  
Month and Day Month and Day11. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) Geothermal production well and piping to  
State manner in which water is to be diverted, i.e. diversion structure,  
geothermal power plant facilities and injection well  
ditches, pipes and flumes, or drilled well, etc.12. Estimated cost of works well \$500,00013. Estimated time required to construct works 1 year

14. Estimated time required to complete the application of water to beneficial use 3 years

15. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use:

This well will be one of an estimated 7 to 15 production and injection wells to be drilled in order to supply geothermal heat to a power generating facility at Brady Hot Springs. Existing point of diversion is shown on map supporting application

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change the point of diversion and place of use of a portion of the geothermal fluid heretofore granted under Permit 47166 is issued subject to the terms and conditions imposed in said Permit 47166 and with the understanding that no other rights on the source will be affected by the changed proposed herein.

This temporary permit is issued subject to existing rights. It is understood that the amount of geothermal fluid herein granted is only a temporary allowance and that the final right obtained under this permit will be dependent upon the amount actually placed to beneficial use. It is also understood that this right must allow for a reasonable decrease of fluid pressure and heat. The well shall be equipped and maintained to prevent any waste of the geothermal fluid. Accurate measurements must be kept of discharge of the production well and the amount of fluid injected into the injection well to determine the total amount of fluid diverted and consumed for a beneficial use.

The production and injection well are to be cemented from the producing levels to the surface to protect fresh water zones. This permit is issued subject to the condition that only geothermal fluids are to be diverted and used beneficially for heating purposes and fresh, cold water aquifers are not to be diverted. The used geothermal fluids are to be returned to the source via the injection well. The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies. A detailed log on the (CONTINUED ON PAGE 2)

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.00 cubic feet per second, but not to exceed 724 acre-  
feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before \_\_\_\_\_

Proof of completion of work shall be filed before \_\_\_\_\_

Application of water to beneficial use shall be made on or before \_\_\_\_\_

Proof of the application of water to beneficial use shall be filed on or before \_\_\_\_\_

Map in support of proof of beneficial use shall be filed on or before \_\_\_\_\_

Completion of work filed \_\_\_\_\_

Proof of beneficial use filed \_\_\_\_\_

Cultural map filed \_\_\_\_\_

Certificate No. \_\_\_\_\_ Issued \_\_\_\_\_

IN TESTIMONY WHEREOF, I, R. MICHAEL TURNIPSEED, P.E., State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 7th day of November,

A.D. 19 91

[Signature]  
State Engineer

WITHDRAWN BY [Signature] JUN 29 1992  
[Signature] P.E. STATE ENGINEER

## (PERMIT TERMS CONTINUED)

injection well and/or other analyses of the system used for returning the used geothermal fluids to the source must be submitted together with the Proof of Completion.

An annual report for this well must be filed under this permit describing the amount of geothermal fluid diverted and consumed to a beneficial use for the calendar year. This report must detail the amount of fluid produced and injected.

The total combined withdrawal of the geothermal fluid under Permits 47166, 47168, 56817-T, 56878-T and 56877-T shall be limited to 2,467 acre-feet per year but the total consumptive use of the geothermal fluid is limited to only incidental fluid losses in the system and in no case shall it amount to more than 20% of the volume withdrawn annually. The State Engineer does not waive the right to make a determination of incidental fluid losses at any time and impose additional conditions thereto. This permit is further issued subject to the provisions of NRS 533.372(1) and with the understanding that the power or energy generated by the beneficial use of this water or steam is subject to recapture and use within the boundaries of the State of Nevada when the need arises.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on November 6, 1992 at which time all rights herein granted shall revert to the right being changed by this temporary permit.
