

(PERMIT TERMS CONTINUED)

The permittee shall submit a report to the State Engineer on a semi-annual basis which contains all surface and groundwater measurements and water use data from each of the permittee's wells which includes the pumping under this temporary permit.

The State Engineer retains the right to impose future conditions as necessary upon review and evaluation of data submitted as a result of the monitoring program on file with the State Engineer.

This temporary permit is further issued subject to the understanding between St. Joe Bullfrog, Inc. (Bond Gold) and the National Park Service dated September 16, 1988, as set forth in the document titled The National Parks Service Position with Respect to the Applications for Water in Amargosa Valley by St. Joe Bullfrog, Inc. (Bond Gold) on file in the State Engineer's office.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 51841 through 51848, inclusive, 57003-T, 57277-T and 57278-T shall not exceed 1500 acre-feet annually.

A monthly report shall be submitted to the State Engineer within 10 days from the end of each month which shall include the amount of water diverted from each well and the amount of water used.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on March 19, 1993 at which time all rights herein granted shall revert to the right being changed by this temporary permit.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions: This temporary permit to change the point of diversion and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 51846 is issued subject to the terms and conditions imposed in said Permit 51846 and with the understanding that no other rights on the source will be affected by the change proposed herein. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. This source is located within an area designated by the State Engineer pursuant to NRS 534.030.

Pursuant to NRS 534.120, the State Engineer declares mining and milling to be a preferred use of the limited resource within the Amargosa Desert Ground Water Basin as described in the State Engineer's Order No. 724, dated May 14, 1979.

The State Engineer's records indicate that the total ground water withdrawals under existing rights in the Amargosa Ground Water Basin has been less than the perennial yield from 1983 through the irrigation season of 1988. This permit is issued with the clear understanding that the State Engineer does not waive any right to regulate and restrict groundwater withdrawals under this permit if withdrawals under existing rights increase or exceed the perennial yield of the groundwater basin.

(CONTINUED ON PAGE 2)

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.0 cubic feet per second, but not to exceed 723.97 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before

Proof of completion of work shall be filed before

Application of water to beneficial use shall be made on or before

Proof of the application of water to beneficial use shall be filed on or before

Map in support of proof of beneficial use shall be filed on or before

Completion of work filed

Proof of beneficial use filed
