APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the place of use of the waters of an underground source as heretofore granted under Permit 34292 is issued subject to the terms and conditions imposed in said Permit 34292 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 58294, 58295, 58296, 58297 and 58298 shall not exceed 557.83 acre-feet annually for use within Mark Twain Unit 10 (204 units) and Daytona Heights Units 1, 2, 3, and 4 (294 units).

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed 2.0 cubic feet per second, but not to exceed 329.32

acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before February 18, 1995

Proof of completion of work shall be filed before March 18, 1995

Application of water to beneficial use shall be made on or before February 18, 1996

Proof of the application of water to beneficial use shall be filed on or before March 18, 1996

Map in support of proof of beneficial use shall be filed on or before N/A

**EXHIBIT "A"**

Lyon County, a political subdivision of the State of Nevada, as successor in title to Permits 29624, 30107, 43084, 34292 & 35561 is filing five (5) applications to change in order to co-mingle all the rights under the above mentioned permits.

Permits 29624, 30107 & 43084 were issued to serve the Mark Twain Estates (also known as Dayton Valley Estates) subdivision. Permits 34292 & 35561 were issued to serve the Daytona Heights subdivision. Title to the water rights supplying these subdivisions has passed to Lyon County and the necessary documents were submitted to the State Engineer's office.

The water systems that service these two subdivision are interconnected. Dayton Utilities, operator of water systems for Lyon County in the Dayton area, has a long range plan to interconnect all of its water systems and expand its service areas to cover all areas requiring water service. Eventually all water rights are to be co-mingled and the places of uses expanded. This phase of the plan involves co-mingling the water rights under these permits and ensuring that the place of use covers both subdivisions.

The total combined duty of all five applications to change is not to exceed 181.77 million gallons annually.
