APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion, place and manner of use of a portion the waters of an underground source as heretofore granted under Permit 9849 Certificate 2784 is issued subject to the terms and conditions imposed in said Permit 9849 Certificate 2784 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

A monthly report shall be submitted to the State Engineer within 10 days from the end of each month which shall include the amount of water pumped from the well and the amount of water used.

(CONTINUED ON PAGE 2)

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.032 cubic feet per second but not to exceed 280.0 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before October 23, 1998

Proof of completion of work shall be filed before November 23, 1998

Application of water to beneficial use shall be made on or before October 23, 2000

Proof of the application of water to beneficial use shall be filed on or before November 23, 2000

Please use the map submitted to support Permit 9849 - Certificate 2784 to define the existing Point of Diversion and Place of Use.

The purpose of this Application is to transfer a portion of the supplemental ground water right under Permit 9849 to a proposed well which will be used to supplement the two infiltration wells drilled for the Genoa Lakes Project under Permits 57327 and 57328. The proposed quasi-municipal ground water well will be pumped when it cannot be demonstrated to the satisfaction of the State Engineer that enough surface water has been infiltrated in the natural channel of Sierra Canyon Creek to allow the withdrawal of 280 acre-feet out of the aforementioned infiltration wells. The use will be for 220 dwelling units, golf course club house, and landscaping within the Genoa Lakes Project.

(PERMIT TERMS CONTINUED)

The total combined duty of water under Permits 57327, 57328 and 60616 shall not exceed 280.0 acre-feet annually.

This permit can only be utilized when the surface water authorized under Permits 57327 and 57328 is not available.
