Question 15 - Remarks

Please use the map on file at the Division of Water Resources under Application 49954 to support the proposed and existing points of diversion and the existing place of use.

This is one of several applications being filed by The Town of Minden to change the place of use of their existing underground water rights. These applications are being filed in conjunction with similar requests by the Gardnerville Town Water Company. The purpose of all the applications to change is to allow their water rights to be used to supplement existing water systems and provide for the future potable water needs of growth in the Carson Valley. The Carson Valley Comprehensive Water Plan shows a future population at "build out" of 82,000. The Water Plan further indicates that the water rights presently held by The Town of Minden and the Gardnerville Town Water Company will be needed to meet the associated water demand under the needs indicated in this Carson Valley Water Plan. With the concurrence and support of Douglas County these applications will allow the future growth within the place of use to be served utilizing water rights which have already been established.

The estimated time to construct all of the improvements and place the water to full beneficial use will be directly related to reaching the master plan level of development as projected in the Comprehensive Water Plan.
