## APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Date of filing in State Engineer's Office JAN 17 1996

Returned to applicant for correction \_\_\_\_\_

Corrected application filed \_\_\_\_\_

Map filed JAN 17 1996

\*\*\*\*\*

The applicant Newmont Gold Company by Paul M. Pettit, Agent, hereby makes application for permission to change the point of diversion and manner of use and place of use of a portion of water heretofore appropriated under permit 52999

\*\*\*\*\*

1. The source of water is underground; well HDDW-2 (formerly FCDW-1)
2. The amount of water to be changed 4.456 cfs (2000.00 gpm) not to exceed 291.66 AF (65.04 M. gal) annually
3. The water to be used for mining, milling, and dewatering
4. The water heretofore permitted for mining, milling, and domestic
5. The water is to be diverted at the following point Within the NE quarter of the NE quarter of section 10 of T35N, R50E, M.D.B.&M., at a point from which the NE corner of said section 10 bears N 68°36'39"E a distance of 1258 feet. (see attached map).
6. The existing permitted point of diversion is located within the NW quarter of the NE quarter of section 19, T36N, R50E, M.D.B.&M., at a point from which the NE corner of said section 19 bears N74°45'17"E, a distance of 1850.55 feet.
7. Proposed place of use sections 17-20, 31 and 32, T36N, R50E, M.D.B.&M., and section 3, 10, T35N, R50E, M.D.B.&M. also see attachment item 7.
8. Existing place of use sections 17, 18, 19 and 20 of T36N, R50E, M.D.B.&M.
9. Use will be from January 1 to December 31 of each year.
10. Use was permitted from January 1 to December 31 of each year.
11. Description of proposed works A drilled and cased well equipped with a pump, motor, totalizing flow meter, and a pipeline to the place of use.
12. Estimated cost of works One hundred thousand dollars (\$100,000)
13. Estimated time required to construct works one year
14. Estimated time required to complete the application of water to beneficial use one year
15. Remarks: This application is hereby submitted in accordance with well spacing Order 1038. It is intended to replace permit 60870T, which expires April 18, 1996. Upon, and not before, issuance of a permit under this application, Newmont Gold Company withdraws said permit 60870T.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change the point of diversion, place of use and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 52999 is issued subject to the terms and conditions imposed in said Permit 52999 and with the understanding that no other rights on the source will be affected by the change proposed herein. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. This source is located within an area designated by the State Engineer pursuant to NRS 534.030.

This temporary permit will allow the permittee to dewater the pit area. In the interests of the best and most efficient management of the resource, any water obtained as a result of the dewatering operation of Barrick Goldstrike Mines, Inc. or Newmont Gold Company will be used first by the permittee for mining, milling, heap leaching, drilling, road watering and other related mining and milling uses (hereafter referred to as mining and milling uses within the described place of use of the water authorized under Permits) before usage from the water supply wells.

The total combined consumptive duty of water under Permits 49960, 50668 (Certificate 13878), 50939 (Certificate 13880), 51074, 51750, 51963, 52354, 52795 (Certificate 13396), 52797 (Certificate 13397), 52999, 53000, 54335, 54337, 55127, 56607, 56608, 56609, 56610, 56611, 56612, 61851-T through 61859-T, inclusive, and 61988-T will not exceed 2,000 MGA (Million Gallons Annually).

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from the State, Federal and local agencies and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project.

This temporary permit is issued subject to the Water Management Plan and Water Management Plan Addendum among Barrick Goldstrike Mines, Inc.; Newmont Gold Company; and TS Ranch Joint Venture dated May 1, 1989, on file in the Office of the State Engineer.

A monthly report will be submitted to the State Engineer within 10 days after the end of each month which will include measurement of: the volume of water pumped from each well, and the volume of water consumptively used for mining and milling purposes projectwide.

A year-end report will be submitted to the State Engineer no later than 45 days after the end of each calendar year. The report will state: (1) the number of wells drilled under the permits, (2) the number of abandoned wells, (3) the exact location of each well drilled or abandoned, and (4) a supporting map illustrating well locations.

The State Engineer retains the right at any time to require the permittee cooperate in the funding of additional monitoring and modeling by an independent third party. The State Engineer retains the right to impose future conditions as necessary upon review and evaluation of all data submitted reporting on the dewatering plan. The State Engineer retains the right to regulate pumping from the dewatering project and/or any other groundwater withdrawals herein authorized to protect the public interest and existing rights.

Upon permanent cessation of all mining, milling and dewatering purposes, all water granted under the permits will revert back to the source from which it was appropriated, except for any water requirements needed for any mine closure plan and/or to mitigate any adverse impacts caused by dewatering.

All of the above stated conditions are issued subject to having no adverse impacts on existing rights.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on May 12, 1997 at which time all rights herein granted shall revert to the right being changed by this temporary permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 4.456 cubic feet per second, but not to exceed 95.04 million gallons annually.

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed before:

Application of water to beneficial use shall be filed on or before:

Proof of the application of water to beneficial use shall be filed on or before:

Map in support of proof of beneficial use shall be filed on or before:

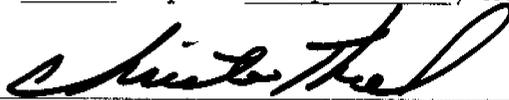

**TEMPORARY**

IN TESTIMONY WHEREOF, I, R. MICHAEL TURNIPSEED, P.E.,

State Engineer of Nevada, have hereunto set

my hand and the seal of my office,

this 13th day of May, A.D. 1996

State Engineer
