

APPLICATION FOR PERMIT
TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of filing in State Engineer's Office JUL 17 1996
Returned to applicant for correction AUG 09 1996
Corrected application filed AUG 14 1996
Map filed AUG 14 1996

The applicant **Independence Mining Company, Inc.**, hereby makes application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated.

1. The source of the proposed appropriation is **underground (SSX)**
2. The amount of water applied for is **2.0 c.f.s., 1446 acre-feet second-feet**
 - (a) If stored in reservoir give number of acre-feet
3. The water to be used for **mining, milling, de-watering & domestic**
4. If use is for:
 - (a) Irrigation, state number of acres to be irrigated
 - (b) Stockwater, state number and kinds of animals to be watered
 - (c) Other use (describe fully under No. 12. "Remarks")
 - (d) Power:
 - (1) Horsepower developed
 - (2) Point of return of water to stream
5. The water is to be diverted from its source at the following point **NW~~NW~~ Section 23, T.40N., R.53E., from which the NW corner of said section bears N. 82°30'W, 454 ft.dist.**
6. Place of Use **T.39N., R.53E. M.D.M. - Sections 1 through 24; T.39N., R.54E. - Sections 5 through 8; 17 through 20; T.40N., R.53E. - all sections, T.40N., R.54E. - W $\frac{1}{2}$ Section 3, 4 through 8, 17 through 20, 29 through 32; T.41N., R.53E. - all sections, T.41N., R.54E. - Sections 5 through 8, 18 through 20, 29 through 33, W $\frac{1}{2}$ 34.**
7. Use will begin about **January 1** and end about **December 31**, of each year.
8. Description of proposed works **connecting underground de-watering sites through pipelines to the portal of the "Saval South Extension" ore body, and converging at the above point of diversion**
9. Estimated cost of works **\$300,000.00**
10. Estimated time required to construct works **one year**
11. Estimated time required to complete the application of water to beneficial use **five years**
12. Remarks: **Approximately 131.4 million gallons (403 acre-feet) per year will be used in dust suppression over a large network of existing and proposed exploration and haul roads approximately 21 million gallons (64.5 acre-feet) per year will be used for make-up water for a back-fill plant; 15.8 million gallons (48.5 acre-feet) per year will be used for exploration; and 26.3 million gallons (81 acre-feet) per year will be used for shop, administration building, cleaning and miscellaneous incidental uses.**

A balance of approximately 277.5 million gallons (852 acre-feet) per year will be disposed of through reinjection (UIC permit #UNEV93214), rapid infiltration basin, direct discharge to surface waters through NPDES permit, or land application. Because of the uncertainty that exists with respect to total volume of water that may be encountered during exploration and mine development, and to allow flexibility in the conduct of operations at the Jerritt Canyon Project, I.M.C.I. respectfully requests granting of the full annual duty requested herein. The duty requested herein is intended to be in addition to, and therefore not supplemental to, other permits granted to the applicant by the State Engineer

Protested _____

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the Proof of Completion of Work is filed.

The issuance of this permit will allow the permittee to dewater the Saval South Extension Mine Project. The State Engineer retains the right to regulate pumping from the dewatering project and/or any other groundwater withdrawals herein authorized to protect the public interest and existing rights. All of the water from the dewatering site not used for consumptive mining and milling purposes shall be injected and returned to the groundwater source in Independence Valley (Hydrographic Groundwater Basin 3-36) upon issuance and in accordance with the Division of Environmental Protection's UIC permit. It is understood that this right must allow for a reasonable lowering of the static water level.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 50675, 52771, 54192, 54878, 59911, 61393, 61394, 62306, 62307, 62428 and 62429 shall not exceed 2,500.0 acre-feet annually.

The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Upon completion of the injection or infiltration program plan, prepare and submit a map to the State Engineer illustrating the location of the sites and delivery system.

Monthly records shall be kept of the following information: (1) The instantaneous pumping rate and the volume of water pumped from each well or other groundwater or surface diversion site, (2) The volume of water consumptively used for mining and milling purposes, (3) The volume of water discharged for disposal, and (4) The water level in each injection well and the change from the last measurement. These records shall be submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

All of the above stated conditions are issued subject to having no adverse impacts on existing rights.

(CONTINUED ON PAGE 2)

(PERMIT TERMS CONTINUED)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 2.0 cubic feet per second, but not to exceed 1,446.0 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before:
April 23, 1998

Proof of completion of work shall be filed before:
May 23, 1998

Application of water to beneficial use shall be filed on or before:
April 23, 2000

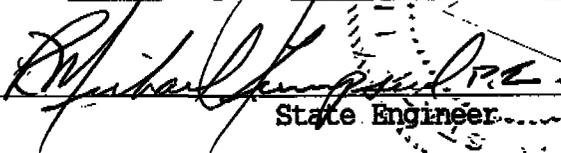

Proof of the application of water to beneficial use shall be filed on or before:
May 23, 2000

Map in support of proof of beneficial use shall be filed on or before:
N/A

IN TESTIMONY WHEREOF, I, R. MICHAEL TURNIPSEED, P.E.,
State Engineer of Nevada, have hereunto set

my hand and the seal of my office,

this 24th day of April, A.D. 1997

State Engineer
