APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of a portion of the waters of an underground source as heretofore granted under Permit 56951 is issued subject to the terms and conditions imposed in said Permit 56951 and with the understanding that no other rights on the source will be affected by the change proposed herein. A totalizing meter must be installed and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the Proof of Completion of Work is filed.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

This permit is issued under the preferred use provisions of NRS Chapter 534. The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the groundwater basin.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies, and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project.

The total combined diversion rate of Permits 54761, 54763, 56406, 56407, 56578, 56951, 57103, 57104, 58385, 58550, 59243, 59244, 59246, 59247, 59248, 59249, 59250, 59251, 59627, 59629, 60288, 60289, 60290, 60291, 60292, 60293, 60294, 60295, 60296, 60297, 60298, 60300, 60301, 60302, 60303, 60606, 60685, 61630-T, 61839-T, 62608, 62609, 62610, 62611, 62612, 62739-T, 62740-T, 62741-T, 62979-T, 62980-T, 62981-T, 62982-T, 62983-T, 62984-T, 62985-T, 62986-T, 62987-T, 62988-T and 62989-T will not exceed 49,400 gallons per minute or 110.06 cubic feet per second for mining, milling and dewatering purposes.

The total volume of water allowed to be diverted under the above mentioned permits and for the same purposes will not exceed 79,682.0 acre-feet annually.

The total combined consumptive duty for mining and milling purposes under the above permits and any changes of these permits must not exceed 6,047.0 acre-feet annually. An additional 10,646.0 acre-feet annually is authorized for substitutive uses.

The limits identified above include 1,576.0 gallons per minute (3.51 cubic feet per second) and 2,543.0 acre-feet annually for sole utilization at the Marigold Mine Project.

All water diverted but not used for mining or milling purposes will be discharged to the Iron Point Relief Canal via the aqueduct completed in June, 1993.

All water diverted will be measured and reported to the State Engineer on a monthly basis. The report will include the amount of water diverted from each well, the amount of water used for mining and milling purposes, and the amount discharged to the Iron Point Relief Canal. This report shall include the amount of water delivered to any other projects. This report must be submitted to the State Engineer within 15 days of the last day of the preceding month.

This permit is issued subject to the "Lone Tree Mining, Inc. Unified Monitoring Plan", March 27, 1993.

The State Engineer will retain the right to require additional monitoring over and above the monitoring required in the monitoring plan mentioned and also will retain the right to seek other disposal options of water discharged to the Iron Point Relief Canal. The State Engineer retains the right to regulate discharge based on flood considerations.

The permittee, on a schedule acceptable to the State Engineer, will prepare and present an update on the activities of the mine and the monitoring plan on a periodic basis, but not less than two times a year.

This permit also incorporates the provisions of Amended Order No. 1086, issued by the State Engineer on January 21, 1994.

(CONTINUED ON PAGE 2)

(PERMIT TERMS CONTINUED)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 3.6 cubic feet per second, but not to exceed 2,606.0 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before:  
May 25, 1998

Proof of completion of work shall be filed before:  
June 25, 1998

Application of water to beneficial use shall be filed on or before:  
May 25, 1999

Proof of the application of water to beneficial use shall be filed on or before:  
June 25, 1999
