

**APPLICATION FOR PERMISSION TO CHANGE POINT OF
DIVERSION, MANNER OF USE AND PLACE OF USE OF THE
PUBLIC WATERS OF THE STATE OF NEVADA
HERETOFORE APPROPRIATED**

Date of filing in State Engineer's Office APR 24 1998
 Returned to applicant for correction MAR 19 1998
 Corrected application filed JUN 01 1998
 Map filed JUN 01 1998

The applicant **Pershing County**, hereby make application for permission to change the **point of diversion, place of use and manner of use** of water heretofore appropriated under **Permit 145 Certificate 568**

1. The source of water is **Prince Royal Canyon**
2. The amount of water to be changed **1.2 cfs**
3. The water to be used for **municipal**
4. The water heretofore permitted for **transportation, fire protection and domestic uses.**
5. The water is to be diverted at the following point **NE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 8, T32N, R34E MDM** or at a point from which the SE corner of said Section 8 bears **S 03° 09' 16" E, a distance of 2,291.94 feet.**
6. The existing permitted point of diversion is located within **springs and seepages therefrom in Prince Royal Canyon in Sections 4 and 9, T31N, R34E MDM and Sections 33, T32N, R34E MDM.**
7. Proposed place of use **The Town of Imlay includes all of Sections 8, 9 and 10, T32N, R34E MDM, the S $\frac{1}{2}$ of Section 4, T32N, R34E MDM, south portion of Section 3 bounded by the Southern Pacific Railroad right-of-way on the north and south section line between Sections 3 and 10 on the south T32N, R34E MDM.**
8. Existing place of use **town site of Imlay in the S $\frac{1}{2}$ Section 4 and the N $\frac{1}{2}$ Section 9, T32N., R34E MDM.**
9. Use will be from **January 1 to December 31** of each year.
10. Use was permitted from **January 1 to December 31** of each year.
11. Description of proposed works **Drill well, install pump motor, meter and transmission line to storage tank and distribution system.**
12. Estimated cost of works **\$370,000.00**
13. Estimated time required to construct works **2 years**
14. Estimated time required to complete the application of water to beneficial use **10 years**
15. Remarks: **This application is to drill a near surface infiltration well which intercepts water from Prince Royal Canyon. The existing pipe line from the springs will be abandoned and water will flow naturally in the existing channel and infiltrate into the ground water system. This water is to serve the town site of Imlay. The estimated use is 300 residential houses, industrial and commercial, school, and public facilities. This application is commingled with**

well 1 and the total combined duty of water for both applications shall not exceed 182.48 million gallons annually.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion, place of use and manner of use of the waters of Prince Royal Canyon as heretofore granted under Permit 145, Certificate 568 is issued subject to the terms and conditions imposed in said Permit 145, Certificate 568 and with the understanding that no other rights on the source will be affected by the change proposed herein. A measuring device must be installed and measurements of water use kept.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Permits 64063 and 64064 are issued with the understanding that the water developed will be from a near surface infiltration well which will intercept water from Prince Royal Canyon which was previously granted under Permits 145 (Certificate 568) and 53276. It is understood that the amount of water herein granted is only a temporary allowance and the final water right obtained under this permit will be dependent on the amount actually placed to beneficial use, however the total combined duty of water under Permits 64063 and 64064 shall not exceed 182.48 million gallons annually.

A suitable measuring device which is capable of measuring daily flow must be installed at a point downstream from the confluence of springs described in Permits 145 (Certificate 568) and 53276 and this location must be approved by the State Engineer. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the Proof of Completion of Work is filed. Monthly records of the amount of flow below the springs at the approved location and the amount of water diverted from the near surface infiltration wells must be kept and submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

The annual diversion under Permits 64063 and 64064 shall not exceed the annual flow measured below the springs at the approved location in any water year.

(CONTINUED ON PAGE 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.2 cubic feet per second, **but not to exceed 182.48 million gallons annually.**

Work must be prosecuted with reasonable diligence and be completed on or before:

November 23, 2000

Proof of completion of work shall be filed before:

December 23, 2000

Application of water to beneficial use shall be filed on or before:

November 23 2005

Proof of the application of water to beneficial use shall be filed on or before:

December 23, 2005

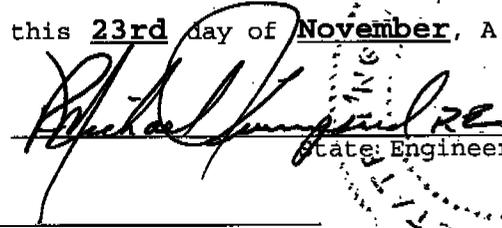

Map in support of proof of beneficial use shall be filed on or before:
