APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the period of use and the average number of livestock served from the waters of this source. It is further understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. The well shall be equipped with a 2-inch opening for measuring depth to water. If well is flowing, a valve must be installed and maintained to prevent waste.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permit 44786, Certificate 11902; Permit 50059, Certificate 12676; Permit 57118, Certificate 14363; Permit 58060, Certificate 14597; Permit 58061, Certificate 14598; Permit 58062, Certificate 14599; Permit 58063, Certificate 14600; Permit 58064, Certificate 14601; Permit 58065, Certificate 14602; Permit 65683, Certificate 16201; Permit 65685, Certificate 16202; and Permits 65626 and 78769 shall not exceed 44.81 acre-feet annually for watering of 2000 cattle.
