APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source. It is understood that the 5.0 c.f.s., herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to a beneficial use. A suitable measuring device must be installed and accurate measurements of the water placed to a beneficial use must be included in the proof of such use when filed. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined diversion of water under Permits 65962, 65963, and 65964 shall not exceed 34.0 cubic feet per second. The total combined consumptive duty of those permits shall not exceed 4,000 acre-feet annually.

Permits 65962, 65963, and 65964 for wetland preservation are specifically issued subject to Permit 29814 and cannot infringe on the primary purpose of Permit 29814, which is to maximize Nevada's Colorado River return flow credit.

The agreement made and entered into on July 18, 2000, by and between the Colorado River Commission of the State of Nevada and the Clark County Board of Commissioners is acknowledged by the State Engineer and has been made a part of the file on each permit.

On a semi-annual basis the permittee must submit to the State Engineer a report describing the method of measurement and the amount of water diverted and consumed.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 5.0 cubic feet per second, **but not to exceed 3,620 acre-feet annually.**

Work must be prosecuted with reasonable diligence and be completed on or before:

**January 24, 2006**

Proof of completion of work shall be filed before:

**February 24, 2006**

Water must be placed to beneficial use on or before:

**January 24, 2011**

Proof of the application of water to beneficial use shall be filed on or before:

**February 24, 2011**

Map in support of proof of beneficial use shall be filed on or before:

**February 24, 2011**
