APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion, manner and place of use of a portion of the waters of an underground source as heretofore granted under Permit 63629 is issued subject to the terms and conditions imposed in said Permit 63629 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The permittee shall report to the State Engineer on a quarterly basis the effect of pumping the well under this permit on other previously existing wells that are located within 2,500 feet of the well under this permit.

Any pumping of water under this permit may be limited or prohibited to prevent any unreasonable adverse effects on an existing domestic well located within 2,500 feet of the well under this permit, unless the holder of this permit and the owner of the domestic well have agreed to alternative measures that mitigate adverse effects.

Monthly records shall be kept of the water pumped from the well under this permit and the well under Permits 39806, 51079, 51080, 51096 and 51097 and any subsequent water rights added to any of these wells. The records shall be submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

The issuance of this permit reduces the total combined duty of Lyon County Permits 49483; 49486, Certificate 14718; 50361; 56593, Certificate 14706; 58931, Certificate 14719; 58932; 58933, Certificate 14720; 58934; 62937; 62938; 62939; 62940; 63626; 63627; 63628; 63629; 63630; 63631; 63632; 63633; 64128; 64957 and 65120 by 100 acre-feet to 5,363.25 acre-feet annually.

The issuance of this permit expires Temporary Permit 66049-T.
(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.055 cubic feet per second, but not to exceed 32.585 million gallons annually.

Work must be prosecuted with reasonable diligence and be completed on or before:

April 26, 2002

Proof of completion of work shall be filed before:

May 26, 2002

Water must be placed to beneficial use on or before:
