

THE STATE OF NEVADA
PERMIT TO APPROPRIATE WATER

Name of applicant: SIERRA READY MIX LLC
Source: UNDERGROUND
Basin: IVANPAH VALLEY-NORTHERN PART
Manner of Use: INDUSTRIAL
Period of Use: January 1st to December 31st
Priority Date: 11/06/2000

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance issued under the provisions of NRS 533.371 for a finite period of time. This permit will expire on December 31, 2028 and all rights herein will revert back to the source. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The issuance of this limited duration permit has been authorized by the State Engineer pursuant to the permittee returning water to the Ivanpah Valley - Northern Part hydrographic basin by the infiltration of waters from the mud settling pond. Initially this permit is issued for 250 acre-feet annually.

If the permittee submits sufficient evidence of recharge to the basin, the State Engineer may increase the total duty of this permit up to 350 acre-feet annually.

Permit 66906 will expire upon issuance of this permit.

(Continued on Page 2)

Monthly records shall be kept of the following and reported within 15 days after the end of each quarter:

- A. The total amount of water pumped from the well in acre-feet.
- B. The maximum flow rate from the well in cubic feet per second.
- C. The pumping water level from the well in feet above mean sea level.
- D. The volume of water consumptively used for mining and milling in acre-feet.
- E. The amount of water diverted to the infiltration or injection sites in acre-feet.
- F. The amount of water diverted to other consumptive uses, if any, in acre-feet.
- G. The amount of water lost through evaporation or other system losses project wide.

This permit will be re-evaluated at the completion of every 5 year period beginning January 1, 2014 for impacts to the hydrographic basin.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated is initially limited to the amount which can be applied to beneficial use, **and not to exceed 1.0 cubic feet per second or 250.0 acre-feet annually. An additional credit of 100 acre-feet annually may be granted under this permit if it can be demonstrated that water is being recharged back to the basin in an amount acceptable to the State Engineer.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

N/A

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

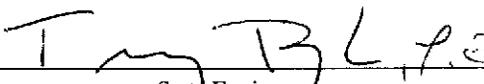

November 24, 2013

Map in support of proof of beneficial use shall be filed on or before:

N/A

IN TESTIMONY WHEREOF, I, TRACY TAYLOR, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 24th day of November, A.D. 2008

 State Engineer

APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of filing in State Engineer's Office NOV 06 2000

Returned to applicant for correction _____

Corrected application filed DEC 14 2000

Map filed DEC 14 2000

The applicant **Sierra Ready Mix L.L.C.**, hereby make application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated.

1. The source of the proposed appropriation is **An underground source**
2. The amount of water applied for is **one (1) second-feet**
 - (a) If stored in reservoir give number of acre-feet
3. The water to be used for **industrial purposes**
4. If use is for:
 - (a) Irrigation, state number of acres to be irrigated
 - (b) Stockwater, state number and kinds of animals to be watered
 - (c) Other use (describe fully under No. 12. "Remarks") **To wash 6,000 tons of sand per day**
 - (d) Power:
 - (1) Horsepower developed
 - (2) Point of return of water to stream
5. The water is to be diverted from its source at the following point **The NE¼ of the SW¼ of Section 6, T26S., R60E., Mt. Diablo B&M at a point where the NW corner of said Sec. 6 bears N 21° 00' W 3771 feet**
6. Place of Use **Within the NE¼ of the SW¼ of Sec. 6, T26S., R60E., Mt. Diablo B&M.**
7. Use will begin about **Jan. 1st.** and end about **Dec. 31st.** of each year.
8. Description of proposed works **From an 850 foot deep, 8" dia. well equipped with a 60 h.p. pump. Piped to a Screening and Wash plant. (see #12 below)**
9. Estimated cost of works **\$85,000.00**
10. Estimated time required to construct works **2 years**
11. Estimated time required to complete the application of water to beneficial use **5 years**

66923

12. Remarks: Water required is 250 acre feet per year for washing and screening 6,000 tons per day of sand. Wash water will be recycled. Evaporation losses and moisture contained in the material shipped cannot be reused
