#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion, place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 56477, is issued subject to the terms and conditions imposed in said Permit 56477 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The permittee shall keep monthly records of the amount of water pumped from this well and the records submitted to the State Engineer on an annual basis by February 15th of each year.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 66976 through 66987, 66990, 66992 through 66994, 66996, 66997 and 66999 shall not exceed 4,795.88 acre-feet annually. However, pursuant to the Stipulation and Settlement Agreement in the Eighth Judicial District Court of the State of Nevada in and for the County of Clark, Case No. A459577, Dept. No. XV, only 4,316.29 acre-feet (the net consumptive use amount) can be diverted annually. Additional duty up to the total may be granted if it can be shown that this additional duty will not cause the consumptive use amount to be exceeded.

Pursuant to State Engineer's Ruling #5167, a monitoring, management and mitigation plan must be submitted and approved by the State Engineer prior to any water being diverted under this permit.

The place of use for these permits is limited to the Lower Meadow Valley Wash Hydrographic Basin (Basin 205).

(Continued on Page 2)

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

A total of 250.4 acre-feet annually is abrogated from the base right. However, pursuant to the Stipulation and Settlement Agreement in the Eighth Judicial District Court of the State of Nevada in and for the County of Clark, Case No. A459577, Dept. No. XV, **only 225.36 acre-feet annually at 2.73 cubic feet per second can be diverted annually.** Additional duty up to the total may be granted if it can be shown that this additional duty will not cause the consumptive use amount to be exceeded.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

January 13 2018

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

January 13 2021

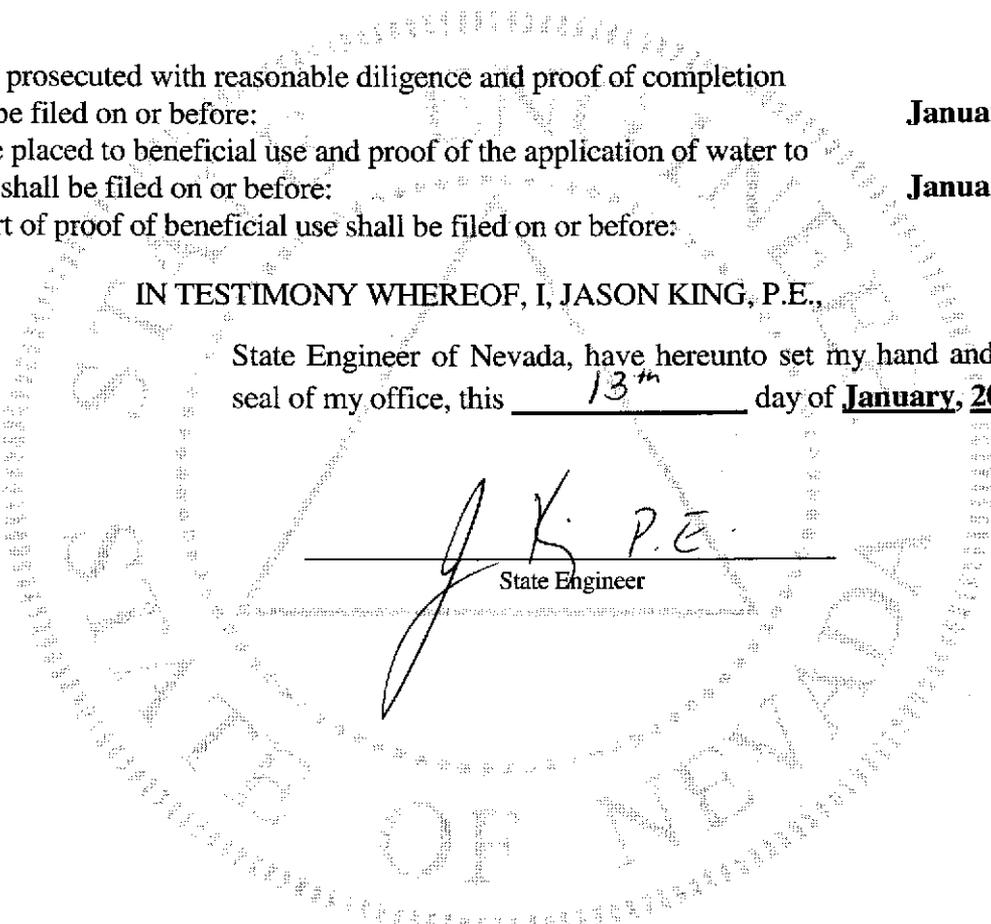

Map in support of proof of beneficial use shall be filed on or before:
