APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the place of use of the waters of an underground source as heretofore granted under Proof 04880 is issued subject to the terms and conditions imposed in said Proof 04880 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 67155, 67156, 67157, and 814a-S02 shall not exceed 290 acres.

This permit is limited to the supplemental irrigation of 229.51 acres within the proposed place of use. The total land irrigated under Permits 67155, 67156, 67157 and 814a-S02 shall not exceed 290 acres.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The issuance of this permit completely abrogates Proof of Appropriation 04880.

This permit may not be placed to beneficial use until water is unavailable under Permits 67155 and 67156.

This permit is issued with the understanding that it is supplemental to Permits 67155, 67156, and 814a-S02 and cannot be used as a sole supply for irrigation.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 3.0 cubic feet per second, but not to exceed 1032.8 acre-feet seasonally.

Work must be prosecuted with reasonable diligence and be completed on or before:

May 25, 2002

Proof of completion of work shall be filed before:

June 25, 2002

Water must be placed to beneficial use on or before:

May 25, 2003

Proof of the application of water to beneficial use shall be filed on or before:

June 25, 2003

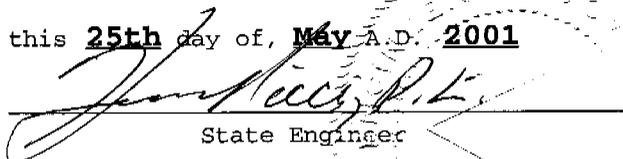

Map in support of proof of beneficial use shall be filed on or before:

June 25, 2003

IN TESTIMONY WHEREOF, I, HUGH RICCI, P.E.,

State Engineer of Nevada, have hereunto set
my hand and the seal of my office,

this 25th day of, May A.D. 2001

State Engineer

Completion of work filed JUN 28 2002
