APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of a portion of the waters of an underground source as heretofore granted under Permit 53313, is issued subject to the terms and conditions imposed in said Permit 53313, and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

The total combined duty of water under Permits 52089, 53313, 60214, 67632, and 67633 shall not exceed 59.86 million gallons annually.

This permit is further issued subject to the terms and conditions of the State Engineer's ruling number 2815 issued July 15, 1983.

A monitoring plan must be established and maintained for the new well field, and approved by the State Engineer. The monitor locations must be measured monthly and the records submitted on a quarterly basis with the pumping records.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.1 cubic feet per second, **but not to exceed 5.986 million gallons annually.**

Work must be prosecuted with reasonable diligence and be completed on or before:

January 18, 2004

Proof of completion of work shall be filed before:

February 18, 2004

Water must be placed to beneficial use on or before:

January 18, 2007

Proof of the application of water to beneficial use shall be filed on or before:

February 18, 2007

Map in support of proof of beneficial use shall be filed on or before:

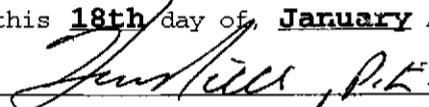

N/A
