APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 60616 is issued subject to the terms and conditions imposed in said Permit 60616 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 42384, Certificate 14208; 42385, Certificate 14209; 52731, Certificate 14213; 63860, 64095, 66342, 68337, 68338, 68792, 68793, 68794, 68795, 68796 and 68797 shall not exceed 398.07 acre-feet annually.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

This permit can only be utilized when the surface water under Permits 68337 and 68338 is not available.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.032 cubic feet per second, but not to exceed 280 acre-feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before:

January 28, 2005

Proof of completion of work shall be filed on or before:

February 28, 2005

Water must be placed to beneficial use on or before:

January 28, 2009

Proof of the application of water to beneficial use shall be filed on or before:

February 28, 2009

Map in support of proof of beneficial use shall be filed on or before:

Permit 60616

#15 (Remarks): The well proposed under Permit 60616 was not drilled. The existing Place of Use under this permit is only a portion of the Genoa Lakes development. After speaking with Steve Brown about the possibility of moving the water, Douglas County is filing an Application to Change on Permit 60616. The Place of Use under Permit 60616 is being changed to match that of the current Genoa Water System Service Area.

The proposed Point of Diversion will be Walleys Hot Springs Resort Well #2. Douglas County will be assuming ownership of the Walleys Hot Springs Resort water system and water rights. The Walleys water system and the Genoa water system will be inter-tied.
