No. 69600-T

TEMPORARY

APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Date of filing in State Engineer's Office FEB 21 2003

Returned to applicant for correction _____

Corrected application filed _____

Map filed FEB 14 2002 under 68460-T

The applicant **Round Mountain Gold Corp, Homestake Nevada Corp, BaRGold Corp dba Smoky Valley Common Operation**, hereby makes application for permission to change the point of diversion, place and manner of use of a portion of water heretofore appropriated under Permit #44297

1. The source of water is sump collection of water from mining pit highwall seaps
2. The amount of water to be changed 0.01 cfs
3. The water to be used for mining, milling, domestic, and dewatering
4. The water heretofore permitted for mining, milling, and domestic
5. The water is to be diverted at the following point within the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$ of Section 30, T:10N, R:44E, M.D.M., or at a point from which the NW corner of Section 24 bears N 53 degrees 23 minutes 34 seconds W for a distance of 12,186.6 feet
6. The existing permitted point of diversion is located within NW $\frac{1}{4}$ SW $\frac{1}{4}$ Sec 19, T10N, R44E, MDM, at a point from which the SW corner of said Section 19 bears S 18 degrees 48' W 2098 feet
7. Proposed place of use within Sections 17, 18, 19, 20, 29, 30 & 31, T10N, R44E, M.D.B&M. (portions unsurveyed); Sections 13, 23, 24, 25, 26, 34, 35 & 36, T10N, R43E, M.D.B&M.; Section 6, T9N, R44E; and Sections 1, 2, & 3 T9N, R43E, M.D.B.&M.
8. Existing place of use w/in Sections 17, 18, 19, 20, 29, & 30 T10N, R44E MDM (portions unsurveyed) and Sections 13, 23, 24, 25, & 26, T10N R43E MDM
9. Use will be from January 01 to December 31 of each year.
10. Use was permitted from January 01 to December 31 of each year.
11. Description of proposed works Existing works.
12. Estimated cost of works \$20,000
13. Estimated time required to construct works Water seepage is collected via a "French Drain" system into a sump. Sump is pumped and water distributed.
14. Estimated time required to complete the application of water to beneficial use Temporary right.
15. Remarks: This sump will serve to collect water seeping from the pit highwall, thus aiding in the stability of the highwall and pit access roads. The water developed will be co-mingled

with other water rights held by the applicant and will primarily be utilized in the mining and milling processes.

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions.

This temporary permit to change the point of diversion, place of use and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 44297, is issued subject to the terms and conditions imposed in said Permit 44297 and with the understanding that no other rights on the source will be affected by the change proposed herein. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. This source is located within an area designated by the State Engineer pursuant to NRS 534.030.

This temporary permit will allow the permittee to dewater the pit area.

It is understood that any water pumped as a result of the production and dewatering operation shall be used first by the permittee for mining, milling, heap leaching, drilling, road watering and other related mining uses within the described place of use on this permit.

Any water pumped and not used for mining and milling purposes shall be infiltrated back to the Big Smoky Valley Groundwater Basin, Northern Part (137B). The permittee shall discharge water in a manner to achieve maximum conservation of the water resource. It is understood that this right must allow for a reasonable lowering of the static water level.

The State Engineer will retain the right to require additional monitoring of the water levels in observation and monitor wells and of the flow rates of surface sources. The permittee, on a schedule acceptable to the State Engineer, shall prepare and present an update on the activities of the mine and the monitoring on a periodic basis, but not less than two times per year.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate land.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project.

The total combined duty of water for consumptive purposes under Permits 536, 1077, Certificate 267; 2908, Certificate 353; 3898, Certificate 2347; 12442, Certificate 3831; 12445, Certificate 3832; 12768, Certificate 3751; 14119, Certificate 4889; 26650, Certificate 13904; 26652, Certificate 13905; 44297; 44299; 44300, Certificate 13174; 50971; 51577, Certificate 13185; 51578, Certificate 13186; 53365, 55498, 55500 through 55503, inclusive; 59217, 59218, 60874, 60875, 60876 and Temporary Permits 68892-T through 68895-T, inclusive; 69247-T, 69600-T through 69625-T, inclusive, and 69668-T through 69691-T, inclusive will not exceed 13,910, acre-feet annually.

(CONTINUED ON PAGE 3)

A monthly report shall be submitted to the State Engineer within 15 days after the end of each calendar quarter which shall include: (A) the volume of water pumped from each well, (B) the measurement of pumping water level (drawdown) from each production, dewatering and monitoring well, (C) the volume of water consumptively used for mining and milling uses projectwide, (D) the volume of water used for dust control purposes projectwide, and (E) the amount of water discharged for infiltration.

A method that estimates the amount of evaporative losses from the discharge system shall be submitted with the monthly report. The evaporative losses will be considered as part of the combined duty for consumptive purposes.

The State Engineer retains the right to impose future conditions as necessary upon review and evaluation of all data submitted reporting on the dewatering program, water use and the monitoring plan. The State Engineer retains the right to regulate pumping from the dewatering project and/or any other groundwater withdrawals herein authorized to protect the public interest and existing rights:

All of the above stated conditions are issued subject to having no adverse impacts on existing rights.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **June 8, 2004** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.01 cubic feet per second, but not to exceed 7.24 acre feet annually.

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed before:

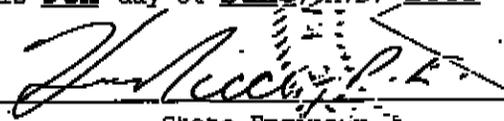

Water must be placed to beneficial use on or before:

Proof of the application of water to beneficial use shall be filed on or before:

Map in support of proof of beneficial use shall be filed on or before:

IN TESTIMONY WHEREOF, I, HUGH RICCI, P.E.,

State Engineer of Nevada, have hereunto set
my hand and the seal of my office,
this 9th day of June, A.D. 2003
