APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 36330, Certificate 9624 is issued subject to the terms and conditions imposed in said Permit 36330, Certificate 9624 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 66887, 66888 71181-T, 71182-T, and any water of the Walker River Decree C-125, and storage water appurtenant to the place of use shall not exceed 771.0 acre-feet per year for the irrigation of 192.75 acres within the described place of use. The permit holder is responsible for insuring delivery of the entitled decreed and storage waters (surface waters) that are supplemental to these groundwater permits. In years that the Walker River Irrigation District declares a full allocation of decreed water to the C-125 decree claims supplemental to these permits, or is able to provide full delivery of storage water to lands supplemental to these permits, groundwater shall not be pumped from the wells described in these permits. In years that the Walker River Irrigation District declares a reduced allocation of decreed or storage waters to claims supplemental to these permits, then surface waters must be used in entirety before any ground water can be pumped from the wells to complete the allocated duty of acre-feet per acre. In years that the Walker River District has no decreed or storage water, then ground water can be pumped from wells to provide the allocated duty for the permitted place of use.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **July 28, 2005** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.70 cubic feet per second, but not to exceed 388.8 acre-feet annually, and not to exceed a yearly duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

Proof of completion of work shall be filed on or before:

Water must be placed to beneficial use on or before:

Proof of the application of water to beneficial use shall be filed on or before:

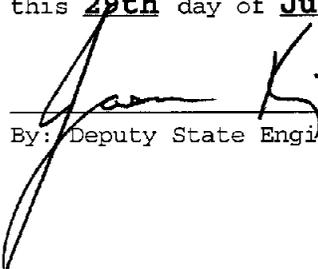

Map in support of proof of beneficial use shall be filed on or before:

TEMPORARY

IN TESTIMONY WHEREOF, I, HUGH RICCI, P.E.,

State Engineer of Nevada, have hereunto set  
my hand and the seal of my office,

this 29th day of July, A.D. 2004

 P.E.  
By: Deputy State Engineer, Jason King, P.E.
