This amended permit to change the point of diversion, place of use and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 69758 is issued subject to the terms and conditions imposed in said Permit 69758 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a two (2) inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permits 59604, 59605, 59606, 64043, 64044, 64574, 64575, 65101, 65562, 65715, 66829, 67016, 67950, 69430, 71363, 71937, 71938, 72967, 73592, 73593, 73646, 73647, 73691, and 76361, being owned by Desert Utilities, Inc. and having the same place of use, shall not exceed 11.79 cubic feet per second and 2,794.99 acre-feet annually. Permits 64574 and 64575 are for backup water only and do not add to the total combined duty of water.

(Continued on Page 2)

If any water under this permit is cancelled, withdrawn, or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.0205 cubic feet per second but not to exceed 11.95 acre-feet annually.**
