#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion, place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 19453, Certificate 6007, is issued subject to the terms and conditions imposed in said Permit 19453, Certificate 6007 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 41169, 72041, 73084, 73527, 74029, 74030, 74741, and 74932, having the same point of diversion, shall not exceed 2.669 cubic feet per second and 815.22 acre-feet annually for all purposes. Any use of water from this well for irrigation purposes shall be metered separately.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled, withdrawn, or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

Any dedication of water from this permit for a residential subdivision shall be allocated at 1.12 acre-feet per lot. The State Engineer may amend the per lot allocation based on evidence and data supporting such change.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.1442 cubic feet per second or 51.5 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

January 10, 2009

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

January 10, 2018

Map in support of proof of beneficial use shall be filed on or before:

**15. Remarks:**

The water under this application and another application being filed concurrently will be transferred to Pahrump Utility Company, Inc. for the benefit of the "Tesora at Pahrump" development by Anchor Development, upon approval of the annexation agreement by and between Pahrump Utility Company, Inc. and William G. Goff, Jr., Trustee.

This water will be combined with the water being transferred to Pahrump Utilities under Applications 73527 and 73528 (making a total of 220.0 AFA of water being transferred for this project)

Please use Proof of Beneficial Use map on file at the Division of Water Resources under Permit 19453 to support the existing point of diversion and existing place of use; and under Application 73527 to support the proposed point of diversion and proposed place of use.
