

THE STATE OF NEVADA

PERMIT TO APPROPRIATE WATER

Name of applicant: COLVIN & SON, LLC
Source: UNDERGROUND
Basin: LITTLE FISH LAKE VALLEY
Manner of Use: IRRIGATION
Period of Use: April 15th to October 15th
Priority Date: 07/19/2006

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the Proof of Completion of Work is filed.

The permittee shall keep monthly records of the amount of water pumped from this well and the records must be submitted to the State Engineer on an annual basis within 30 days after the end of each calendar year.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Any application to change this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin, and may be restricted to the consumptive use (2.4 acre-feet annually) portion for changes to areas outside of the Little Fish Lake Valley Hydrographic Basin (150).

(Continued on Page 2)

This permit is issued subject to State Engineers Ruling # 5991.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 1.61 cubic feet per second or 254.84 acre-feet per 120-day season, and not to exceed a duty of 3.5 acre-feet per acre of land irrigated from any and/or all sources.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

November 9, 2010

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

November 9, 2012

Map in support of proof of beneficial use shall be filed on or before:

November 9, 2012
