APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion, place and manner of use of a portion of the waters of Thomas Creek as heretofore granted under Claim 718, Truckee River Decree, is issued subject to the terms and conditions imposed in said decree and with the understanding that no other rights on the source will be affected by the change proposed herein. A suitable measuring device must be installed and accurate measurements of water placed to beneficial use must be kept.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This primary permit is issued pursuant to the provisions of Nevada Revised Statutes (NRS) 533.440 and is only a temporary allowance. Secondary permits are required for the use of the appropriated water, and the final water right obtained will be dependent upon the amount of water actually placed to beneficial use under the secondary permits. A totalizing meter must be installed near the point of diversion and accurate measurements must be maintained of all water stored. The permittee shall notify downstream users prior to the filing of any secondary applications.

A monitoring plan that includes locations and types of measuring devices shall be submitted to and approved by the State Engineer and the Federal Water Master prior to any diversion of water under this permit.

A monthly report of the water diverted and placed into storage must be submitted to the State Engineer and Federal Water Master within fifteen (15) days after the end of each month.

This permit is issued subject to continuing jurisdiction and regulation by the Federal Water Master

The point of diversion and place of use is as described under items 5 and 7 respectively on the submitted application to support this permit.

The amount of water to be stored under this primary permit shall be limited to 39.66 acre-feet as decreed.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

N/A

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

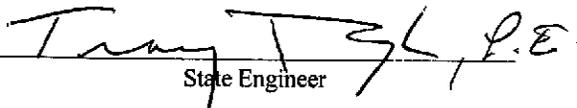

August 14, 2017

Map in support of proof of beneficial use shall be filed on or before:

Remarks

This application to change is associated with Washoe County's South Truckee Meadows Surface Water Treatment Plant.

Upon permitting of this application, Washoe County will file secondary applications to place the stored water to beneficial use. Secondary applications will be filed for municipal, artificial recharge, recovery and wildlife (in-stream flow) purposes. These secondary applications will provide the needed flexibility to Washoe County to beneficially use this water under all three or either one of the manners of use with the understanding that the total combined duty will not exceed that of the primary storage permit duty.

In reference to the in-stream flow/wildlife secondary applications contemplated in this project, Washoe County stipulates to notify the downstream parties, i.e. Pyramid Lake Paiute Tribe, T.C.I.D. and Churchill County, prior to filing of said secondary application. The purpose of the notification is to seek consensus on the disposition of the water under the secondary applications once it reaches the main stem of the Truckee River, and the relative rights to this water at Derby Dam.

This application is being made for the benefit of Aidia C. (formerly Casazza) Keller, current owner of these water rights. These water rights will be dedicated to Washoe County once this application is ready for action.
