MANNER OF USE AND PLACE OF USE OF THE
PUBLIC WATERS OF THE STATE OF NEVADA
HERETOFORE APPROPRIATED

Name of applicant: BOARD OF REGENTS, UNIVERSITY OF NEVADA SYSTEM
Source: TRUCKEE RIVER
Basin: TRACY SEGMENT
Manner of Use: AS DECREED
Period of Use: AS DECREED
Priority Date: 12/01/1861

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same,
subject to the following limitations and conditions:

This temporary permit to change the point of diversion and place of use of a portion of the waters of
the Truckee River as heretofore granted under Claim 601, Truckee River Final Decree, is issued subject to
the terms and conditions imposed in said decree and with the understanding that no other rights on the
source will be affected by the change proposed herein. Before any use of the water begins, a totalizing
meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate
measurements must be kept of the waters placed to beneficial use.

This permit does not extend the permittee the right of ingress and egress on public, private or
corporate lands.

The total combined duty of water under Temporary Permits 75478T and 75479T shall not exceed
215.31 acre feet as decreed.

The total combined duty of water under Temporary Permits 75477T, 75478T, and 75479T shall not
exceed 350.0 acre-feet as decreed for the irrigation of 77.78 acres within the proposed place of use.

The issuance of this permit does not waive the requirements that the permit holder obtain other
permits from State, Federal and local agencies.

Temporary Permits 75477T, 75478T, and 75479T are issued subject to the availability of water as
determined by the Federal Water Master.

The total combined diversion of water under Temporary Permits 75478T and 75479T shall not
exceed 1.345 cubic feet per second.

The point of diversion and place of use is as described under items 5 & 7 respectively on the
submitted application to support this permit.

The amount of water to be changed shall be limited to the amount which can be applied to
beneficial use, and not to exceed 1.345 cubic feet per second, but not to exceed 215.31 acre-feet as
decreed.

Work must be prosecuted with reasonable diligence and proof of completion
of work shall be filed on or before:

N/A

Water must be placed to beneficial use and proof of the application of water to
beneficial use shall be filed on or before:

N/A

Map in support of proof of beneficial use shall be filed on or before:

ATTACHMENT TO TEMPORARY APPLICATION TO CHANGE TRUCKEE RIVER
DECREE CLAIM 601

Item 15. Remarks

This Application is one of two being filed concurrently to temporarily change a portion of Claim 601. These two changes are proposed to be used supplementally from two points of diversion, established in 2006, at pumps in the Truckee River. These two applications will be utilized in conjunction with a third Application to Change a portion of Claim 607. This is part of The Nature Conservancy's continuing efforts to rehabilitate natural vegetation at the McCarran Ranch and to assist in the improvement of water quality in the Truckee River. This project is a cooperative effort of The Nature Conservancy, the City of Reno, and the University of Nevada, Reno. A total of 350 AFA is proposed to be temporarily moved from the University's Main Farm area downstream to be used within the McCarran Ranch acreage acquired by The Nature Conservancy. In the first three years of use of this water, approximately 20 acres of riparian and wetland areas were planted and watered, including approximately 10,000 trees. During the last year, the McCarran Ranch project has expanded with the establishment of a new meander bend in the river, establishment of nine (9) new wetland areas, and further riparian forest development, with extensive planting of trees and other shrubs and vegetation. These areas will need to be temporarily irrigated for the next three to four growing seasons.

The duty of water under Claims 601 and 607 is 4.0038 acre-feet per acre and 1.0039 acre-feet per acre, respectfully. Although these applications are removing 53.78 acres and 134.81 acres from the Claims 601 and 607 irrigation areas, the duty proposed for transfer will reflect the decreed duty of the surface water rights at the proposed place of use (4.5 acre-feet per acre). This will allow a total of 77.78 acres to be irrigated annually within the overall 393.63 acres.

Please use Truckee River Decree Maps TR-045 and TR-046 and the map 67182 on file at the Division of Water Resources to support the existing point of diversion and place of use, and the map on file under 67962-T to support the proposed place of use.
