EXHIBIT "B "

15. Remarks:

This application is filed pursuant to the provisions of NRS §533.515 in that it seeks to add the reservoirs described in Exhibit A and as listed in Item 11 above as additional points of diversion for the consumptive use component of the water rights described herein, which consumptive use component is 2.50 acre-feet per acre per year, and which water rights have points of diversion in the State of Nevada. The base right to be stored under this application has already been reduced to reflect a 2.5 acre-feet per acre per year duty. This application is also filed as part of the implementation of the operating agreement described in Section 205(a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application allowing for storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will be the consumptive use component of 2.50 acre-feet per acre. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

If the consumptive use component of a water right described herein is not diverted to storage, the consumptive use component duty of the water right will continue to be diverted at its allowed points of diversion for its manner of use. The non-consumptive use component of the water right remains in the Truckee River.

Any permit issued under this application shall enter into effect simultaneously with the entry into effect of the Truckee River Operating Agreement.
