

THE STATE OF NEVADA

PERMIT TO APPROPRIATE WATER

Name of Permittee: DOUGLAS W. CARSON, TRUSTEE OF THE
DOUGLAS W. CARSON TRUST DATED 10/19/90

Source: UNDERGROUND

Basin: WHITE RIVER VALLEY

Manner of Use: IRRIGATION AND DOMESTIC

Period of Use: MARCH 1ST THROUGH OCTOBER 15TH

Priority Date: 05/23/2007

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the proof of completion of work is filed. The State retains the right to regulate the use of the water granted herein at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

This permit is also issued subject to the provision that the place of use of the water herein granted is limited to and supplemental to lands having existing water rights.

The total combined duty of the waters under Permit 7251, Certificate 1330; Permit 70969 (Smith Creek); and Permit 75775 shall not exceed 384.44 acre-feet seasonally for the irrigation of 85.43 acres, of which 75.67 acres (340.51 acre-feet) are supplemental to surface water under these two permits.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.0 cubic feet per second or 384.44 acre-feet seasonally, but not to exceed 4.5 acre-feet per acre from all sources.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

May 6 2016

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

May 6 2019

Map in support of proof of beneficial use shall be filed on or before:

May 6 2019

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 6th day of May, 2014

State Engineer
