**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of the waters of an underground source as heretofore granted under Permit 62736, Certificate 16868 is issued subject to the terms and conditions imposed in said Permit 62736, Certificate 16868 and with the understanding that no other rights on the source will be affected by the change proposed herein. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. This source is located within an area designated by the State Engineer pursuant to NRS 534.030.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies, and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project.

This permit will allow the permittee to dewater the pit area. Any water obtained as a result of the dewatering operation will be used first by Barrick Goldstrike Mines Inc. for mining, milling, heap leaching, drilling, road watering and other related mining and milling uses (hereafter referred to as mining and milling uses within the described place of use) before usage from water supply wells, and by Newmont Gold Company for the same purposes stated above at what is known as the No. 4 Mill.

Any water not used for mining and milling purposes may be utilized by the TS Ranch on land for irrigation use presently described under the place of use under Permit 16951, Certificate 5605; Permit 16952, Certificate 5606; Permit 28966, Certificate 10226; Permit 28967, Certificate 10227; Permit 29952, Certificate 10043; Permit 29953, Certificate 10044; Permit 30240, Certificate 10046; Permit 30242, Certificate 10048; Permit 30253, Certificate 10229; Permits 31288, 31289, 34770, 34771, 34773, 36022, 52941, 52942, 52943, 52944, 52945, 52946, 52947, 52948, 52949, 52950, 54827, 54828, 54829, 54830, 54831, 54832, 54833, 54834, 54835, 54836, 54837, 54838 and 54839 or any subsequent changes of the place of use of these rights.

The intent, in the interests of the best and most efficient management of the resource, is to substitute water from the dewatering of the pit area for water presently authorized to be withdrawn from the Boulder Flat Groundwater Basin under the above described permits.

Any water not used for mining and milling purposes may be utilized: to address water right impairment, if any, resulting from the diversion of water pursuant to the Barrick applications; to satisfy water use and water management requirements, if any, resulting from actions taken by other governmental agencies; to inject or infiltrate water; to replace existing authorized groundwater withdrawals; and to serve other beneficial uses that would not adversely impact other water rights.

This water may be diverted to storage and/or discharged through the reservoir constructed under Dam Application J-320. Rights to place such water to use for consumptive purposes or non-consumptive purposes will be provided under Primary Permit 55272 and any secondary permits issued thereunder.

(Continued on Page 2)

The total combined consumptive duty of water under Permits 55139, 55140, 55141, 55142, 55143, 55145, 55146, 55148, 55149, 55150, Permit 57223, Certificate 14855; Permit 57227, Certificate 14859; Permit 57231, Certificate 14861; Permits 58354, 58355, 58470, Certificate 14865; Permit 58471, Certificate 14866; Permit 58472, Certificate 14867; Permit 58473, Certificate 14868; Permit 58474, Certificate 14869; Permit 58475, Certificate 14870; Permit 58476, Certificate 14871; Permit 58543, Certificate 14872; Permit 58544, Certificate 14873; Permit 58545, Certificate 14874; Permit 58546, Certificate 14875; Permit 58547, Certificate 14876; Permit 59685, Certificate 14389; Permit 59686, Certificate 14390; Permit 59687, Certificate 14391; Permit 59688, Certificate 14392; Permit 59860, Certificate 15144; Permit 59861, Certificate 15145; Permit 60565, Certificate 14863; Permit 60566, Certificate 14864; Permit 60782, Certificate 15146; Permit 60785, Certificate 15149; Permit 60786, Certificate 15150; Permits 61407, 62736, Certificate 16868; Permit 62737, Certificate 16869; Permit 63127, Permit 63767, Certificate 16870; Permits 64279, 69695, 69782, Certificate 16871; Permits 69957, 70986, 70987, 70988, 70989, 71690, 71691, 71692, 71693, 71694, 71695, 76044, 76045, 76046, 76047, 76048, 76049, 76050, 76051, 76052, 76053 and Temporary Permit 75266T shall not exceed 11,733 acre-feet annually for mining and milling purposes.

The authorized uses under this permit are subject to the terms and provisions of that "Stipulation, Settlement Agreement and Withdrawal of Protest" concerning Application No's 55139 through 55150, inclusive, and Application No. 55272, between Barrick Goldstrike Mines Inc., or its successors and Eureka County, dated February 6, 1991; and Addendum of said stipulation, dated November 27, 1996, filed in the State Engineer's office.

This permit is subject to the "Boulder Valley Monitoring Plan" previously approved by the State Engineer on April 10, 1991.

This permit is issued subject to, and also incorporates the terms and conditions set forth in the State Engineer's Order No. 1038, Order Adopting Rules For Well Spacing and Modification of Regulations For Water Well and Related Drilling (January, 1990) in the Northern Area of the Heretofore Designated Boulder Flat Ground Water Basin (4-61), dated March 29, 1991, on file in the office of the State Engineer.

This permit is issued subject to, and also incorporates the terms and conditions set forth in the State Engineer's Order No. 1132, Order Amending Conditions and Provisions of Permits Issued to Barrick Goldstrike Mines Inc. to Appropriate Underground Water of the Boulder Flat Ground Water Basin (4-61), dated July 1, 1997, on file in the office of the State Engineer.

The total combined diversion rate of water under Permits 55139, 55140, 55141, 55142, 55143, 55144, 55145, 55146, 55147, 55148, 55149, 55150 and any subsequent changes will not exceed 100 cubic feet per second, and the total combined withdrawal of water under these permits and any subsequent changes will not exceed 72,000 acre-feet annually.

The State Engineer may require additional monitoring should conditions warrant such modification.

Monthly records shall be kept of the following and reported within 15 days after the end of each quarter:

- A. The total volume of water pumped from each diversion in acre-feet.
- B. The maximum flow rate from each diversion in cubic feet per second.
- C. The pumping water level from each well in feet above mean sea level.
- D. The volume of water consumptively used for mining and milling in acre-feet.
- E. The amount of water diverted to the infiltration sites in acre-feet.
- F. The amount of water diverted to other consumptive uses, if any, in acre-feet.
- G. The amount of water lost through evaporation or other system losses project wide.

A year-end report will be submitted to the State Engineer no later than 45 days after the end of the calendar year. The report will state: (1) the number of wells drilled under the permits, (2) the number of abandoned wells, (3) the exact location of each well drilled or abandoned, and (4) a supporting map illustrating well locations and surface water management. The permittee, on a quarterly schedule, will prepare and present an update on the activities of the mine and dewatering projects to the State Engineer.

The State Engineer retains the right at any time to require the permittee to cooperate in the funding of additional monitoring and modeling by an independent third party. The State Engineer retains the right to impose future conditions as necessary upon review and evaluation of all data submitted on the dewatering program, water use and the monitoring plan. The State Engineer retains the right to regulate pumping from the dewatering project and/or any other groundwater or surface withdrawals or discharges herein authorized to protect the public interest and existing rights.

All of the above stated conditions are issued subject to having no adverse impacts on existing rights.

(Continued on Page 3)

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 1.0 cubic feet per second or 723.97 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

N/A

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

June 23, 2011

Map in support of proof of beneficial use shall be filed on or before:

Additional remarks to applications to change permits 58543, 59686, 60782, 60785, 62736, 62737, 63767, and 70988

Item 15-Remarks

Applications to change the point of diversion under Permits 58543 (Certificate 14872), 59686 (Certificate 14390), 60782 (Certificate 15146), 60785 (Certificate 15149), 62736, 62737, 63767, and 70988 are concurrently being filed to well BW-35. There are presently two permits, 69782 and 71691, to divert water from BW-35.

BW-35 produces 2836 gpm, (6.32 cfs), 1490.90 mga.

Upon granting of the proposed change applications, the total rights on BW-35 would be 10.675 cfs but because of annual duty limitations the total combined annual duty would be 1413.37 mga.

Diversion under the water rights will be rotated because the allowable appropriation of 10.675 cfs will exceed the well capacity of 6.32 cfs. This practice will allow diversion of the full diversion and duty entitlement under each right without exceeding the total combined quantities or the production capacity of well BW-35.

TABULATION OF DIVERSION RATES & DUTIES AFTER GRANTING  
PROPOSED CHANGE APPLICATIONS TO BW-35
