

THE STATE OF NEVADA
PERMIT TO CHANGE POINT OF DIVERSION,
MANNER OF USE AND PLACE OF USE OF THE
PUBLIC WATERS OF THE STATE OF NEVADA
HERETOFORE APPROPRIATED

Name of applicant: DAVID M. LITTLE FAMILY TRUST AGREEMENT
Source: UNDERGROUND
Basin: MASON VALLEY
Manner of Use: IRRIGATION
Period of Use: January 1st to December 31st
Priority Date: 12/09/1976

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of the waters of an underground source as heretofore granted under Permit 69192 is issued subject to the terms and conditions imposed in said Permit 69192 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 76181, 76182 and 76301 shall not exceed 191.28 acre feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled, withdrawn, or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

This permit for underground water is issued as a supplemental water supply to lands that have surface water rights from the Walker River as set forth in the Walker River Decree C-125, or from storage water provided from the Walker River Irrigation District. The total diversion of water for irrigation from any and all sources shall not exceed the duty of water for this place of use as set forth in the Decree. Underground water shall not be pumped from the well described in these permits except to the extent necessary to make up the portion of the entitled duty from Decree and Storage water in any given year.

This permit is limited to the supplemental irrigation of 10.82 acres within the proposed place of use.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.108 cubic feet per second or 43.28 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

August 6, 2009

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

August 6, 2011

Map in support of proof of beneficial use shall be filed on or before:

August 6, 2011

IN TESTIMONY WHEREOF, I, TRACY TAYLOR, P.E.,
