APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion, place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 11158, Certificate 3079, is issued subject to the terms and conditions imposed in said Permit 11158, Certificate 3079 and with the understanding that no other rights on the source will be affected by the change proposed herein.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 63185, 63562, 74756 and 76386, having the same point of diversion, shall not exceed 0.066 cubic feet per second and 11.58 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled, withdrawn, or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

This permit is issued for Quasi-Municipal purposes on the parcel identified by the Clark County Assessor as APN 138-06-605-009.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.004 cubic feet per second or 2.86 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before: July 22, 2009
