APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change a portion of the place of use of the waters of an underground source as heretofore granted under Permit 19734, Certificate 6434 is issued with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter will be installed on the well discharge. Measurements must be kept of the water used on the place of use of Permit 19734, Certificate 6434 and on the place use of Temporary Permit 76998T. The totalizing meter must be installed before any use of the water begins. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permit 19734, Certificate 6434 and Temporary Permits 76998T and 76999T shall not exceed 2,413.60 acre-feet annually.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Approval of Temporary Permit 76998T is subject to any necessary approvals from the Walker River Irrigation District and appropriate ditch companies. Any water diverted from the well in exchange for water diverted from the West Walker River shall be assessed a 10 percent reduction to account for conveyance loss. Coordination must be made with Walker River Irrigation District as to when the well is pumped and as to the amount.

The total combined diversion rate under Permit 19734, Certificate 6434, Temporary Permits 76998T and 76999T shall not exceed 5.4 second feet.

With the issuance of Temporary Permits 76998T and 76999T the following lands under Permit 19734, Certificate 6434 and Permit 12372, Certificate 3667 shall not be irrigated from those permits: 28.6 acres in the NE $\frac{1}{4}$ NE $\frac{1}{4}$; 28.6 acres in the SE $\frac{1}{4}$ NE $\frac{1}{4}$; 20.6 acres in the NE $\frac{1}{4}$ SE $\frac{1}{4}$; 12.2 acres in the NW $\frac{1}{4}$ SE $\frac{1}{4}$; 40.0 acres in the NW $\frac{1}{4}$ NW $\frac{1}{4}$; 14.0 acres in the NE $\frac{1}{4}$ NW $\frac{1}{4}$; 14.0 acres in the SW $\frac{1}{4}$ NW $\frac{1}{4}$; 28.0 acres in the SW $\frac{1}{4}$ SW $\frac{1}{4}$; 2.3 acres in the SE $\frac{1}{4}$ SW $\frac{1}{4}$; and 28.3 acres in the NW $\frac{1}{4}$ SW $\frac{1}{4}$ all in Section 35, T.11N., R.23E., M.D.B.&M. Records of the amount of water pumped from this well shall be made at such time the well is pumping and to which location within the proposed place of use this water is being delivered and the amount delivered. This report shall be submitted on a monthly basis no later than 10 days after the end of each month.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **October 31, 2008** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)
