#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change the point of diversion of the waters of an underground source as heretofore granted under Permit 57188 is issued subject to the terms and conditions imposed in said Permit 57188 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on **December 31, 2009** at which time all rights herein granted shall revert to the right being changed by this temporary permit.

(Continued on Page 2)

This temporary permit is limited to the irrigation of 60 acres within the described place of use. A map must be submitted to the State Engineer that contains a pictorial description of the sixty acres to be irrigated, including information of what are the current priorities or storage allocations appurtenant to the lands. Water shall not be pumped from the well in exchange for river water until the State Engineer has notified the permittee that map is complete and acceptable. The combined duty of water under temporary Permit 78145-T and any waters of the Walker River and any storage water appurtenant to the lands under this permit shall not exceed 240 acre-feet annually. Measurements of the water delivered to the proposed place of use under the Walker River Decree or storage rights must be furnished to the State Engineer within 10 days of start of pumping of water at the proposed point of diversion.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.75 cubic feet per second or 240.0 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

N/A

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

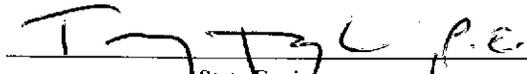

N/A

Map in support of proof of beneficial use shall be filed on or before:
