

# AMENDED

## THE STATE OF NEVADA

### PERMIT TO APPROPRIATE WATER

**Name of applicant:** LAS VEGAS VALLEY WATER DISTRICT  
**Source:** UNDERGROUND  
**Basin:** GARNET VALLEY  
**Manner of Use:** MUNICIPAL  
**Period of Use:** January 1st to December 31st  
**Priority Date:** 11/02/2009

\*\*\*\*\*

#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The permittee shall keep monthly records of the amount of water pumped from this well and the records must be submitted to the State Engineer on an annual basis within 30 days after the end of each calendar year.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 79002 and 79007, having the same point of diversion, shall not exceed 1.295 cubic feet per second and 349.8 acre-feet annually.

The total combined duty of water under permits 79001 through 79010 is 1,400 acre-feet annually. However, a maximum of 1,550 acre feet maybe be pumped from those rights in any given year provided the 10-year rolling total does not exceed 14,000 acre-feet.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

(Continued on Page 2)

The well authorized under this permit must be drilled into and only draw water from the carbonate system. The demonstration of such construction must be submitted to the State Engineer prior to putting any water to beneficial use.

All provisions of the monitoring plan submitted to the State Engineer for approval under base right Permits 54073, 54074 and 68822 shall remain in force, and will apply to all subsequent change applications and new diversion-only appropriations. If information from the monitoring plan or other studies demonstrates an adverse impact on existing rights, mitigation will be required to the satisfaction of the State Engineer.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.5 cubic feet per second or 349.8 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

May 20, 2011

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

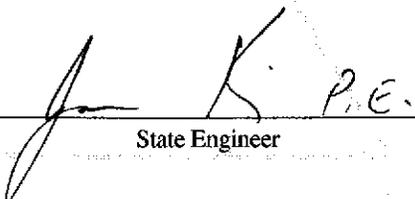

May 20, 2015

Map in support of proof of beneficial use shall be filed on or before:

N/A

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

The permittee shall keep monthly records of the amount of water pumped from this well and the records must be submitted to the State Engineer on an annual basis within 30 days after the end of each calendar year.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 79002 and 79007, having the same point of diversion, shall not exceed 1.295 cubic feet per second and 349.8 acre-feet annually.

The total combined duty of water under Permits 54073, 54074, 68822, 74399, 78954T, 79001, 79002, 79003, 79004, 79005, 79006, 79007, 79008, 79009 and 79010 shall not exceed 2274.57 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled, withdrawn, or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

The well authorized under this permit must be drilled into and only draw water from the carbonate system. The demonstration of such construction must be submitted to the State Engineer prior to putting any water to beneficial use.

(Continued on Page 2)

All provisions of the monitoring plan submitted to the State Engineer for approval under base right Permits 54073, 54074 and 68822 shall remain in force, and will apply to all subsequent change applications and new diversion-only appropriations. If information from the monitoring plan or other studies demonstrates an adverse impact on existing rights, mitigation will be required to the satisfaction of the State Engineer.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.5 cubic feet per second or 349.8 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

May 20, 2011

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

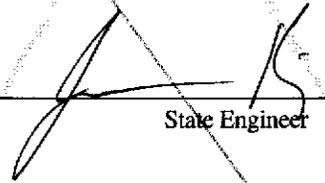

May 20, 2015

Map in support of proof of beneficial use shall be filed on or before:

**APPLICATION FOR PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA**

THIS SPACE FOR OFFICE USE ONLY	
Date of Filing in State Engineer's Office	<u>NOV 02 2009</u>
Returned to applicant for correction	_____
Corrected Application filed	_____ Map filed <u>NOV 04 2009</u> under <u>79001</u>

The applicant Las Vegas Valley Water District  
1001 S. Valley View Blvd. of Las Vegas  
Street Address or P.O. Box City or Town  
Nevada 89153 hereby make(s) application for permission to appropriate the  
State and ZIP Code

public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

- 
- The source of water is Underground - Garnet Valley  
Name of the stream, lake, underground, spring or other sources.
  - The amount of water applied for is 0.50 c.f.s.  
One second foot equals 448.83 gallons per minute.  
 (a) If stored in a reservoir give the number of acre-feet \_\_\_\_\_
  - The water is to be used for Municipal  
Irrigation, power, mining, commercial, domestic or other use. Must be limited to one major use.
  - If use is for:
    - Irrigation, state number of acres to be irrigated \_\_\_\_\_
    - Stockwater, state number and kind of animals \_\_\_\_\_
    - Other use (describe fully in No. 12) \_\_\_\_\_
    - Power:
      - Horsepower developed \_\_\_\_\_
      - Point of return of water to stream \_\_\_\_\_

*216-44*

5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

within NE1/4 SE1/4 Section 5, Township 18 South, Range 63 East, MDM, Clark County, NV at a point from which the NE corner of Section 5 bears North 14° 34' 38" East, a distance of 4,089.36 feet.

said

ACE

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

See attached exhibit

7. Use will begin about January 1 and end about December 31 of each year.

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

Drilled well, pump, motor, and pipelines.

9. Estimated cost of works: No additional construction is necessary at this time

10. Estimated time required to construct works: Existing, see Proof of Completion for Permit 72798

(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: 10 years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

The existing well is drilled to 2,000 feet deep (see attached Well Driller's Report log no. 86905 and Proof of Completion for Permit 72798). Water will be diverted by a pump, motor, and pipeline. Water will be metered. If future conditions warrant, additional pipelines may be constructed to further interconnect the water supplies of the geographically distinct places of use.

13. Miscellaneous remarks:

This application is for diversion rate only. The well has a capacity of approximately 1.25 cfs. The additional capacity will allow the well the pump at its maximum rate. See exhibit.

## Exhibit

### 7. Proposed place of use:

- 1) is 90 acres within the N 1/2 SE 1/4 and the NE 1/4 of Section 5, Township 18 South, Range 63 East, MDM, Clark County, NV as shown Exhibit A-1 of the deed recorded April 16, 2001 in Book 20010416 as document number 01904 of the official records, Clark County, NV;
- 2) is within the NE 1/4, the SE 1/4 and the SE 1/4 of the SW 1/4 of Section 5, Township 18 South, Range 63 East, MDM, Clark County, Nevada;
- 3) is within the E 1/2 NE 1/4 and E 1/2 SE 1/4, Section 15, Township 18 South, Range 63 East, MDM, Clark County, NV, also referenced as Parcel 1, File 101, Page 16 of Parcel Maps, APN 103-15-000-003;
- 4) is within portions of Section 12, 13, 35, all of Section 24, 25, and 36, Township 17 South, Range 63 East, MDM, Clark County, NV; portions of Section 7, all of Sections 18, 19, 30, and 31, Township 17 South, Range 64 East, MDM, Clark County NV; and, portions of Section 1 and 2, Township 18 South, Range 63 East, MDM, Clark County NV.

### 16. Miscellaneous remarks: The applicant is concurrently submitting:

- a. Change Applications to change:
  - i. The point of diversion and place of use for all of the water appropriated under Permit Nos. 72798, 73149, 73150, and 73151, and
  - ii. The point of diversion and place of use for half of the water appropriated under Permit No. 68822.

These Change Applications request a common place of use of four power generation facilities located in Garnet Valley, and request a maximum combined duty of 1,550 AFA with a ten-year rolling total not to exceed 14,000 acre-feet.
- b. New Applications for diversion rate only from the points of diversion for the change applications to Permit Nos. 73149, 72798, 73150, 73151, and 68822, to allow for each well to be pumped at a higher capacity.

Approval of these Applications will allow for additional flexibility to meet the water demands of the power generation facilities located in Garnet Valley and will allow their continued operation and possible expansion without the appropriation of additional water in Garnet Valley.
