**APPROVAL OF STATE ENGINEER**

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of diversion herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins, or before the Proof of Completion of Work is filed. This source is located within an area designated by the State Engineer, pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permits 79816 and 79817, being fully supplemental, shall not exceed 0.0183 cubic feet per second and 13.25 acre-feet annually.

The total combined duty of water under Permits 79760, 79761, 79762, 79763, 79814, 79815, 79816 and 79817, having the same place of use, shall not exceed 0.497 cubic feet per second and 128.85 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is issued for use at the cemetery within the described place of use, further identified by the Clark County Assessor as APN 177-12-201-002.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.0183 cubic feet per second or 13.25 acre-feet annually.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

March 23 2012

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

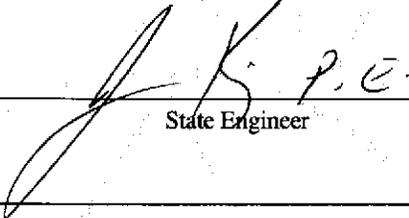

March 23 2014

Map in support of proof of beneficial use shall be filed on or before:

(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: Five (5) years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

The water is to be used for an existing memorial park (cemetery). The primary use of the water will be for landscape irrigation, but water will also be used for other operating needs of the memorial park.

13. Miscellaneous remarks:

No additional water is being sought. This application is intended to be a "twin" to a change application (a change to Permit 42176, Certificate 12325) which is also for 13.25 acre-feet per year. The intention is to allow the same 13.25 acre-feet per year to be shared between the two wells on the property. Reports of Conveyance for Permits 42175 and 42176 are being submitted simultaneously with this application.
