

THE STATE OF NEVADA

PERMIT TO CHANGE THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Name of Permittee: ELLIS & DIANNE FARIAS
Source: UNDERGROUND
Basin: SMITH VALLEY
Manner of Use: COMMERCIAL AND DOMESTIC
Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST
Priority Date: 12/18/1970

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion, place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 61898 is issued subject to the terms and conditions imposed in said Permit 61898 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 79973 and 79974 shall not exceed the net consumptive use amount of 1.55 acre-feet. Additional diversion up to a total of 2.0 acre-feet may be granted if it can be shown that the additional diversion will not cause the consumptive use amount to be exceeded.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

(Continued on Page 2)

A total of 2.0 acre-feet annually is abrogated from the base right. However, pursuant to NRS 533.3703 **only 1.55 acre-feet (the net consumptive use amount) at 0.016 cubic feet per second can be diverted annually.** Additional duty up to the total may be granted if it can be shown that this additional duty will not cause the consumptive use amount to be exceeded.

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

August 28 2016

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

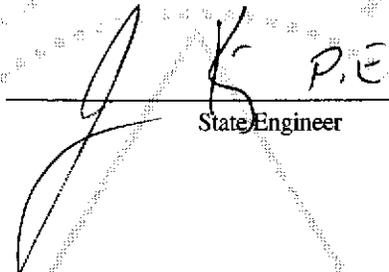

August 28 2018

Map in support of proof of beneficial use shall be filed on or before:
