This permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 11024, Certificate 4403 is issued subject to the terms and conditions imposed in said Permit 11024, Certificate 4403 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permit 11024, Certificate 4403 and Permit 80015, having a commingled place of use, shall not exceed 56.50 acre-feet annually.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

If any water under this permit is cancelled or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

This permit is issued for irrigation purposes within the described place of use, further identified by the Clark County Assessor as APN 125-23-201-001.

The point of diversion and place of use are as described on the submitted application to support this permit.
