#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion, place and manner of use of a portion of the waters of an underground source as heretofore granted under Permit 67001, Certificate 15977, is issued subject to the terms and conditions imposed in said Permit 67001, Certificate 15977, and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

Due to its proximity to the "O Line" canal, the well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 60108, 60109, 60110, 60114, 60115, 67000, 67001, 67002 and 67003 shall not exceed 2259.58 acre-feet annually for the irrigation of 574.81 acres.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

(Continued on Page 2)

**Permit No. 80235**

This permit is approved for the entire 20 acre-feet annually as requested. However, pursuant to NRS 533.3703, initially only the net consumptive use amount of the base right, 16.79 acre-feet, can be diverted annually. Additional diversion up to the total 20 acre-feet may be granted if it can be shown that the additional diversion will not cause the consumptive use of 16.79 acre-feet to be exceeded.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.0281 cubic feet per second or 20.0 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

March 30 2013

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

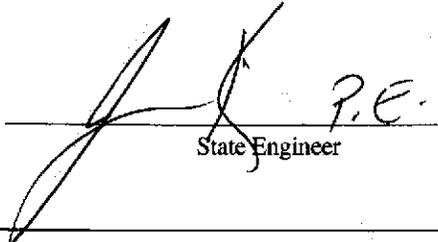

March 30 2016

Map in support of proof of beneficial use shall be filed on or before:
