This well shall be equipped with a two (2) inch opening for measuring depth to water and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. If any water under this permit is cancelled or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

Any dedication of water from this permit for residential service shall be allocated at the per lot or unit duty prescribed by the State Engineer in the letter dated November 4, 2008. The State Engineer may amend this dedicated allocation based on evidence and supporting data.
