APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to existing rights. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level. This well shall be equipped with a two (2) inch opening for measuring depth to water. If the well is flowing, a valve must be installed and maintained to prevent waste. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of water begins or before the Proof of Completion of Work is filed.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This permit is supplemental to portions of surface water under Permit 7345, Certificate 1953; Permit 7346, Certificate 1954; Permit 7347, Certificate 1955; Permit 7494, Certificate 1956; Permit 10648, Certificate 3668; Permit 13224, Certificate 4710 and the Crum and Wilson Decree and underground water rights under Permit 13719, Certificate 4226 and Permit 66301, Certificate 17962.

The point of diversion and place of use are as described on the submitted application to support this permit.
