#### APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit, to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 40004, is issued subject to the terms and conditions imposed in said Permit 40004 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water. A totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

Before any pumping begins, a groundwater monitoring plan must be submitted and approved by this office.

The permittee shall keep monthly records of the amount of water pumped from this well and the records must be submitted to the State Engineer on an annual basis within 30 days after the end of each calendar year.

The total combined duty of water under Permit 17661, Certificate 7410; Permit 27437, Certificate 9943; Permits 34765, 35976, 40001, 40004, and 49229; Permit 56403, Certificate 14256; Permits 57168, 57169, 61767, 63161, 63162, 70287, 70290, 70291, 74490, 80297, 81142, 81143, 81398, 81399, 81400 and 81401 shall not exceed 8,900.36 acre-feet annually.

Pursuant to NRS 534.110(3), monthly records shall be kept of the effect of pumping this well on other previously existing wells that are located within 2,500 feet of this well and reported to the State Engineer on an annual basis by February 15th of the following year. Any pumping of water in this well may be limited or prohibited to prevent any unreasonable adverse effects on an existing domestic well located within 2,500 feet of this well, unless the holder of this permit and the owner of the domestic well have agreed to alternative measures that mitigate adverse effects.

(Continued on Page 2)

The place of use of this permit is limited to the Fernley Area Hydrographic Basin (076).

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 1.0 cubic feet per second or 723.97 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

**Filed Under 70290 on February 26, 2008**

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

**March 21, 2025**

Map in support of proof of beneficial use shall be filed on or before:
