14. Estimated time required to complete the application of water to beneficial use 10 years

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Comstock Mining is moving forward to production commencing with crushing and leaching. They will need 175 - 200 acre feet for their operations. A new 3,000,000 gallon solution pond is under construction. Breaking ground soon on a 1,000,000 gallon process water storage pond above well WS-3. 85% of the crushing system is on site. The other concern for needing temporary change applications is that Storey County Water Utilities may not be able to provide all necessary water in peak demand times.

16. Miscellaneous remarks:

Reference map filed with the State Engineer with the temporary permit 81031T for the POD and the supporting map submitted with this temporary change application for the POD and POU. Comstock Mining, Inc. has entered into a one year leasing agreement with Vidler Water for 150 acre feet.
