

THE STATE OF NEVADA

PERMIT TO CHANGE THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Name of Permittee: DESERT PEARL FARMS, LLC
Source: UNDERGROUND
Basin: MASON VALLEY
Manner of Use: IRRIGATION
Period of Use: JANUARY 1ST THROUGH DECEMBER 31ST
Priority Date: 04/07/1960

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion, place of use and manner of use of the waters of an underground source as heretofore granted under Permit 66303 is issued subject to the terms and conditions imposed in said Permit 66303 and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The well must be sealed with cement grout, concrete grout or neat cement from ground level to 100 feet.

The total combined duty of water under Permits 81586, 81587, 81699, 81700, 81701, 81702 and 81703 shall not exceed 2,001.34 acre-feet annually for the irrigation of 500.335 acres.

Any well drilled or used under base right Permit 66303 shall be plugged in accordance with the Nevada Administrative Code, Chapter 534.420, "Regulations for Water Well and Related Drilling" within 60 days from the issuance of this permit.

The total combined duty of water under Permits 81586, 81587, 81699, 81700, 81701, 81702 and 81703; any water from the Walker River Decree C-125 and any storage or flood water appurtenant to the place of use shall not exceed 2,001.34 acre-feet annually for the irrigation of 500.335 acres within the described place of use.

(Continued on Page 2)

This permit for underground water is issued as a supplemental water supply to land that has surface water and the underground water is to be used to supply water to the extent that surface water is not available; thus all types of surface water must be used to the extent that they are available before underground water may be used to supplement the surface water. The permit holder is responsible for insuring delivery of the surface water from entitled decreed, flood and storage rights that these permits supplement. In any year that the Federal Water Master and the Walker River Irrigation District declare a full allocation of decreed and decree supplemental storage water to the priority years of C-125 claims that this permit supplements, underground water under this permit shall not be pumped. Any time that the decreed land that this permit supplements is in priority, underground water under this permit shall not be pumped on this land. Additionally, underground water under this permit shall only be pumped from the well described in this permit to supplement the total allocation of Walker River Irrigation District's "newlands" storage water.

This permit for underground water is issued as a supplemental water supply to that land that has surface water rights from the Walker River from Claim Number 11 (Borge, Dora Williams (Dora Williams), Successor to William R. Penrose, p.19), Claim 158 (Walmsley, Florence Williams, Successor to Lizzie Hironymous, et al, p.45), Claim 160 (Williams, Henry, Successor to Lizzie Hironymous, et al, p.45) of the Walker River Decree C-125 and from storage and flood water provided by the Walker River Irrigation District. Irrigation shall not exceed a duty of four (4) acre-feet per acre per season from the total of decreed, storage, flood and underground waters.

The change in place of use of Permits 81699 and 81700 from Permits 66303 and 68007, removes all underground water irrigation from the NE1/4 SE1/4, Section 33, T.14N., R.25E., M.D.M.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 0.56 cubic feet per second or 100.0 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

June 4 2014

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

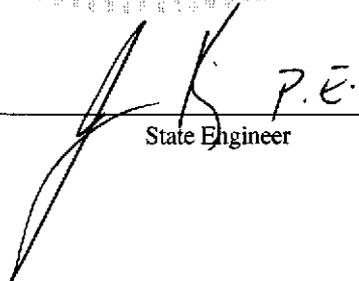

June 4 2018

Map in support of proof of beneficial use shall be filed on or before:

June 4 2018

IN TESTIMONY WHEREOF, I, JASON KING, P.E.,

State Engineer of Nevada, have hereunto set my hand and the seal of my office, this 4th day of June, 2013

State Engineer

APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

THIS SPACE FOR OFFICE USE ONLY

STATE ENGINEER'S OFFICE

1. The source of water is Underground
Name of stream, lake, underground, spring or other sources.
2. The amount of water to be changed 0.56 cubic feet per second - not to exceed 100.00 acre feet per year
Second feet, acre-feet. One second foot equals 448.83 gallons per minute.
3. The water to be used for Irrigation Purposes
Irrigation, power, mining, commercial, etc. If for stock, state number and kind of animals. Must limit to one major use
4. The water heretofore used for Irrigation Purposes
If for stock, state number and kind of animals.
5. The water is to be diverted at the following point (Describe as being within a 40-acre subdivision of public survey and by course and distance to a found section corner. If on unsurveyed land, it should be stated.)
w/in NE1/4 SE1/4 Section 3 T13N, R25E, MDM, or at a point from which the NW corner of said Section 3 bears North 59 degrees 15 minutes 17 seconds West, a distance of 5,355.98 feet - North Well
6. The existing point of diversion is located within (If point of diversion is not changed, do not answer.)
w/in Lot 1 (NE1/4 NE1/4) Section 4 T13N, R25E, MDM, or at a point from which the E1/4 corner of said Section 4 bears South 28 degrees 17 minutes East, a distance of 2,758 feet. Refer to supporting map under Permit No. 66303.

7. Proposed place of use (Describe by legal subdivisions. If for irrigation, state number of acres to be irrigated.)

Refer to attached sheet.

8. Existing place of use (Describe by legal subdivisions. If changing place of use and/or manner of use of irrigation permit, describe acreage to be removed from irrigation.)

25.00 acres within the W1/2 SE1/4 and S1/2 NE1/4 SE1/4 of Section 33 T14N, R25E, MDM. Refer to supporting map under Permit No. 66303.

9. Proposed use will be from January 1st to December 31st of each year.
Month and Day Month and Day

10. Existing use permitted from April 1st to October 31st of each year.
Month and Day Month and Day

11. Description of proposed works. (Under the provision of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e., diversion structure, ditches, pipes and flumes or drilled well, pump and motor, etc.)

Drilled and cased well, equipped with motor, pump, totalizing meter and irrigation distribution system

12. Estimated cost of works \$50,000

13. Estimated time required to construct works 2 years

If well completed, describe well.

14. Estimated time required to complete the application of water to beneficial use 5 years

15. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

New production wells are being proposed to provide water through existing ditch and irrigation systems to existing fields known as the Hunewill Ranch. Changes to the cultivated area are anticipated based on improvements to existing fields, irrigation systems and their configurations; therefore, the place of use is being changed to accommodate these improvements. The water under this application to change will remain supplemental to the same Walker River decreed claims and Walker River Irrigation District Newland storage permits as the base permit (Permit No. 66303).

16. Miscellaneous remarks:

The well at the existing point of diversion will be plugged in accordance with the Nevada Administrative Code. The period of use is being changed to be consistent with other water rights within this same point of diversion. Refer to attachment for more information.
