THE STATE OF NEVADA

**PERMIT TO CHANGE THE PUBLIC WATERS OF THE
STATE OF NEVADA HERETOFORE APPROPRIATED**

Name of Permittee: BLAKELY FAMILY LIVING TRUST
Source: UNDERGROUND
Basin: MASON VALLEY
Manner of Use: IRRIGATION AND DOMESTIC
Period of Use: ONE YEAR FROM DATE OF ISSUANCE
Priority Date: 04/19/1960

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change the point of diversion of a portion of the waters of an underground source as heretofore granted under Permit 18735, Certificate 6421, is issued subject to the terms and conditions imposed in said Permit 18735, Certificate 6421, and with the understanding that no other rights on the source will be affected by the change proposed herein. This well shall be equipped with a two (2) inch opening for measuring depth to water and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this temporary permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire 1 year after the approval of the permit at which time all rights herein granted shall revert to the right being changed by this temporary permit.

(Continued on Page 2)

The total combined duty of water under Permits 81742T and any water from the Walker River Decree C-125 and any storage water appurtenant to the place of use shall not exceed 464 acre-feet per year for the irrigation of 116 acres within the described place of use.

This temporary permit for underground water is issued as a supplemental water supply to land that has surface water. The underground water is to be used to the extent that surface water is not available. The permit holder is responsible for insuring delivery of the surface water from entitled decreed, flood and storage rights that this permit supplements. In any year that the Federal Water Master and the Walker River Irrigation District declare a full allocation of decreed and decree supplemental storage water to the priority years of C-125 claims that this permit supplements, underground water under this permit shall not be pumped. Any time the decreed land that this permit supplements is in priority, underground water under this permit shall not be pumped. Additionally, underground water under this permit shall only be pumped from the well described in this permit to supplement the total allocation of Walker River Irrigation District's "newlands" storage water.

This temporary permit for underground water is issued as a supplemental water supply to that land that has surface water rights from the Walker River from Claim Number 40 [Faber, J.P., successor to John B. Gallagher, (per J.C. Farral), p.24], of the Walker River Decree C-125, Permit 25017, Certificate 8860 and from storage water provided by the Walker River Irrigation District. Irrigation shall not exceed a duty of four (4) acre-feet per acre annually from the total of decreed, storage, flood and underground waters.

The point of diversion and place of use are as described on the submitted application to support this permit.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, **and not to exceed 1.7553 cubic feet per second or 464.0 acre-feet annually.**

Work must be prosecuted with reasonable diligence and proof of completion of work shall be filed on or before:

N/A

Water must be placed to beneficial use and proof of the application of water to beneficial use shall be filed on or before:

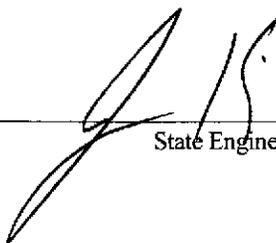

N/A

Map in support of proof of beneficial use shall be filed on or before:
